Browse's Introduction to the Symptoms & Signs of Surgical Disease, Fifth Edition Kevin G. Burnand, John Black, Steven A. Corbett, William E.G. Thomas, 2014-09-26 Written for medical students and junior doctors the fifth edition of this essential textbook has been fully revised and updated including additional illustrations and photographs The text teaches the clinical symptoms and signs of surgical disease stressing the importance of a thorough history and bedside examination By presenting the symptoms and signs in a formalized systematic manner and by describing in detail the techniques of clinical examination this text enables students to elicit key symptoms and make sound clinical decisions **The Complete Bike**

Owner's Manual DK, 2017-06-13 With this full color illustrated manual in your toolbox you will never need to visit the bike repair shop again From planning regular maintenance to getting your hands dirty for emergency repairs The Complete Bike Owner's Manual will help you with everything Explore every part of your bike's anatomy with extremely detailed CGIs learn which seat position suits you the most install new brakes and adjust the handlebar change and refit gear cables and much more This essential book equips you with the tools and techniques you need to troubleshoot any problems you may face while taking care of your bicycle The reference section at the end of the book offers possible solutions to some of the common problems The Complete Bike Owner's Manual is the perfect handy guide for any bicycle enthusiast *Agent and*

Multi-Agent Systems: Technologies and Applications James O'Shea, Ngoc Thanh Nguyen, Keeley Crockett, Robert J. Howlett, Lakhmi C. Jain, 2011-06-22 This book constitutes the refereed proceedings of the 5th KES International Conference on Agent and Multi Agent Systems KES AMSTA 2011 held in Manchester UK in June July 2011 The 69 revised papers presented were carefully reviewed and selected for inclusion in the book In addition the volume contains one abstract and one full paper length keynote speech The papers are organized in topical sections on conversational agents dialogue systems and text processing agents and online social networks robotics and manufacturing agent optimisation negotiation and security multi agent systems mining and profiling agent based optimization doctoral track computer supported social intelligence for human interaction digital economy and intelligent workflow cloud computing and systems *Reconfigurable*

Computing: Architectures, Tools and Applications Oliver Choy, Ray Cheung, Peter Athanas, Kentaro Sano, 2012-03-02 This book constitutes the refereed proceedings of the 8th International Symposium on Reconfigurable Computing Architectures Tools and Applications ARC 2012 held in Hongkong China in March 2012 The 35 revised papers presented consisting of 25 full papers and 10 poster papers were carefully reviewed and selected from 44 submissions The topics covered are applied RC design methods and tools applied RC architectures applied RC applications and critical issues in applied RC *ACARS - A Users Guide* Lionel K. Anderson MSc, 2010-07-07 Aircraft Communications Addressing and Reporting System ACARS is a digital datalink system for transmission of short and relatively simple messages between aircraft and ground stations using the airband VHF radio link The message protocol was designed by Aeronautical Radio Incorporated ARINC to replace their

VHF voice service and deployed in 1978 using telex type format SITA a multinational information technology company later augmented their worldwide data network by adding ground radio stations to provide ACARS service

Social Media and Networking: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources,2015-07-31 In the digital era users from around the world are constantly connected over a global network where they have the ability to connect share and collaborate like never before To make the most of this new environment researchers and software developers must understand users needs and expectations Social Media and Networking Concepts Methodologies Tools and Applications explores the burgeoning global community made possible by Web 2 0 technologies and a universal interconnected society With four volumes of chapters related to digital media online engagement and virtual environments this multi volume reference is an essential source for software developers web designers researchers students and IT specialists interested in the growing field of digital media and engagement This four volume reference includes various chapters covering topics related to Web 2 0 e governance social media activism internet privacy digital and virtual communities e business customer relationship management and more

Sports Economics Roger D. Blair,2011-12-12 Sports Economics the most comprehensive textbook in the field by celebrated economist Roger D Blair focuses primarily on the business and economics aspects of major professional sports and the NCAA It employs the basic principles of economics to address issues such as the organization of leagues pricing advertising and broadcasting as well as the labor market in sports Among its novel features is the candid coverage of the image and integrity of players teams managers and the leagues themselves including cases of gambling cheating misconduct and steroids Blair explains how economic decisions are made under conditions of uncertainty using the well known expected utility model and makes extensive use of present value concepts to analyze investment decisions Numerous examples are drawn from the daily press The text offers ample boxes to illustrate sports themes as well as extensive use of diagrams tables problem sets and research questions

Advances in Practical Applications of Agents and Multiagent Systems Yves Demazeau,Frank Dignum,Juan Manuel Corchado Rodríguez,Javier Bajo,2010-04-15 PAAMS the International Conference on Practical Applications of Agents and Multi Agent Systems is an international yearly stage to present to discuss and to disseminate the latest advances and the most important outcomes related to real world applications It provides a unique opportunity to bring multi disciplinary experts academics and practitioners together to exchange their experience in the development of Agents and Multi Agent Systems This volume presents the papers that have been accepted for the 2010 edition These articles capture the most innovative results and this year s advances Each paper has been reviewed by three different reviewers from an international committee composed of 82 members from 26 different countries From the 66 submissions received 19 were selected for full

presentation at the conference and 14 were accepted as short papers Moreover PAAMS 10 incorporated special sessions and workshops to complement the regular program which included 85 accepted papers

Thermodynamics and Morphodynamics in Wave Energy Antonio Moñino, Encarnación Medina-López, Rafael J. Bergillos, María Clavero, Alistair Borthwick, Miguel Ortega-Sánchez, 2018-04-20 This book examines the performance of oscillating water column OWC wave energy converters It discusses the influence of humid air inside the chamber and changes in the seabed and also investigates the role of wave energy converters in coastal protection The authors use a real gas model to describe the thermodynamics of the air water vapour mixture inside the chamber and the compression and expansion process during the wave cycle Further they present an alternative formulation with new perspectives on the adiabatic process of the gaseous phase including a modified adiabatic index and subsequent modified thermodynamic state variables such as enthalpy entropy and specific heat The book also develops a numerical model using computational fluid dynamics to simulate OWC characteristics in open sea and studies the performance of a linear turbine using an actuator disk model It then compares the results from both cases to find an agreement between the analytical and numerical models when humidity is inserted in the gaseous phase Introducing new concepts to studies of wave energy to provide fresh perspectives on energy extraction and efficiency problems the book is a valuable resource for researchers and industrial companies involved in thermal energy and coastal engineering It is also of interest to undergraduate and postgraduate students as it broadens their view of wave energy

Cases on Open-Linked Data and Semantic Web Applications Ordóñez de Pablos, Patricia, Lytras, Miltiadis D., Tennyson, Robert D., Gayo, José Emilio Labra, 2013-01-31 With the purpose of building upon standard web technologies open linked data serves as a useful way to connect previously unrelated data and to publish structured data on the web The application of these elements leads to the creation of data commons called semantic web Cases on Open Linked Data and Semantic Web Applications brings together new theories research findings and case studies which cover the recent developments and approaches towards applied open linked data and semantic web in the context of information systems By enhancing the understanding of open linked data in business science and information technologies this reference source aims to be useful for academics researchers and practitioners

Tsunami Warning and Preparedness National Research Council, Division on Earth and Life Studies, Ocean Studies Board, Committee on the Review of the Tsunami Warning and Forecast System and Overview of the Nation's Tsunami Preparedness, 2011-03-01 Many coastal areas of the United States are at risk for tsunamis After the catastrophic 2004 tsunami in the Indian Ocean legislation was passed to expand U S tsunami warning capabilities Since then the nation has made progress in several related areas on both the federal and state levels At the federal level NOAA has improved the ability to detect and forecast tsunamis by expanding the sensor network Other federal and state activities to increase tsunami safety include improvements to tsunami hazard and evacuation maps for many coastal communities vulnerability assessments of some coastal populations in several states and new efforts to increase public awareness of the

hazard and how to respond Tsunami Warning and Preparedness explores the advances made in tsunami detection and preparedness and identifies the challenges that still remain The book describes areas of research and development that would improve tsunami education preparation and detection especially with tsunamis that arrive less than an hour after the triggering event It asserts that seamless coordination between the two Tsunami Warning Centers and clear communications to local officials and the public could create a timely and effective response to coastal communities facing a pending tsunami According to Tsunami Warning and Preparedness minimizing future losses to the nation from tsunamis requires persistent progress across the broad spectrum of efforts including risk assessment public education government coordination detection and forecasting and warning center operations The book also suggests designing effective interagency exercises using professional emergency management standards to prepare communities and prioritizing funding based on tsunami risk

Fourier Transforms Goran Nikolic, 2011-04-01 New analytical strategies and techniques are necessary to meet requirements of modern technologies and new materials In this sense this book provides a thorough review of current analytical approaches industrial practices and strategies in Fourier transform application Synchronous data acquisition with wireless sensor networks Funck, Jürgen Helmut, 2018-07-19 Wireless sensor networks WSN are predicted to play a key role in future technological developments like the internet of things Already they are beginning to be used in many applications not only in the scientific and industrial domains One of the biggest challenges when using WSN is to fuse and evaluate data from different sensor nodes Synchronizing the data acquisition of the nodes is a key enabling factor for this So far research has been focused on synchronizing the clocks of the nodes largely neglecting the implications for the actual measurement results This thesis investigates the relation between synchronization accuracy and quality of measurement results Two different classes of time synchronous data acquisition are investigated event detection and waveform sampling A model is developed that describes a WSN as a generic multi channel data acquisition system thus enabling direct comparison to other existing systems With the help of this model it is shown that synchronization accuracy should best be expressed as uncertainty of the acquired timing information This way not only the contribution of the synchronization to the overall measurement uncertainty can be assessed but also the synchronization accuracy required for an application can be estimated The insights from the uncertainty analysis are used to develop two distinct approaches to synchronous data acquisition a proactive and a reactive one It is shown that the reactive approach can also be used to efficiently implement synchronous angular sampling i e data acquisition synchronous to the rotation of a machine s shaft Furthermore testing methods are suggested that evaluate the synchronized data acquisition of an existing WSN as a whole These methods can be applied to other data acquisition systems without changes thus enabling direct comparisons The practical realization of a WSN is described on which the developed data acquisition methods have been implemented All implementations were thoroughly tested in experiments using the suggested testing methods This way it was revealed that a system s interrupt handling

procedures may have a strong influence on the data acquisition Furthermore it was shown that the effective use of fixed point arithmetic enables synchronous angular sampling in real time during a streaming measurement Finally two application examples are used to illustrate the utility of the implemented data acquisition the acoustic localization of two sensor nodes on a straight line and a simple order tracking at an induction motor test bench Diese Dissertation untersucht die Zusammenhänge zwischen Synchronisationsgenauigkeit und Qualität der Messergebnisse Zwei Klassen von zeitsynchroner Datenerfassung werden dabei betrachtet die Detektion von Ereignissen und die Aufnahme von Kurvenformen Es wird ein Modell entwickelt welches ein WSN als ein allgemeines mehrkanaliges Datenerfassungssystem beschreibt Dies ermöglicht den direkten Vergleich zwischen WSN und anderen Messsystemen Weiter wird mit Hilfe des Modells gezeigt dass die Synchronisationsgenauigkeit vorzugsweise als Unsicherheit der Zeitinformation angegeben werden sollte Hierdurch kann nicht nur der Beitrag der Synchronisation zur gesamten Messunsicherheit bestimmt sondern auch die von einer Anwendung tatsächlich benötigte Synchronisationsgenauigkeit abgeschätzt werden Ausgehend von den durch die Unsicherheitsbetrachtung gewonnenen Erkenntnissen werden ein proaktiver und ein reaktiver Ansatz zur synchronen Datenaufnahme entwickelt Mit dem reaktiven Ansatz können Messdaten auch effizient drehwinkelsynchron d.h. synchron zur Drehbewegung einer Maschinenwelle aufgenommen werden Es werden Testverfahren vorgeschlagen mit denen sich die Synchronizität der Datenerfassung für ein WSN als Ganzes überprüfen lässt Diese Verfahren lassen sich unverändert auf andere Messsysteme anwenden und ermöglichen somit direkte Vergleiche Es wird die praktische Umsetzung eines WSN beschrieben auf dem die entwickelten Methoden zur Datenerfassung implementiert wurden Alle Implementierungen wurden mit den vorgeschlagenen Testverfahren untersucht Hierdurch konnte gezeigt werden dass die Interrupt-Bearbeitung der Sensorknoten entscheidenden Einfluss auf die Messdatenerfassung hat Weiter konnte durch den Einsatz von Fixed-Point-Arithmetik die drehwinkelsynchrone Datenerfassung in Echtzeit realisiert werden Schließlich wird die Nutzlichkeit der implementierten Datenerfassung an zwei Anwendungen gezeigt der akustischen Ortung zweier Sensorknoten sowie einer einfachen Ordnungsanalyse

Solar Resources Mapping Jesús Polo, Luis Martín-Pomares, Antonio Sanfilippo, 2019-01-22

This book presents methods for optimising the spatial and network configuration of solar radiation measuring stations Various physical and mathematical models are demonstrated which together with high quality measurements provide the essential tools to generate and validate solar resource estimates to improve the mapping of solar resources Each chapter deals with a specific topic showing its methodology and providing examples of how to apply these techniques with reference to current projects around the world These topics include Radiometric measurement campaigns Equipment calibration installation operation and maintenance Data quality assurance and assessment Solar radiation modelling from satellite images and numerical models Downscaling and kriging interpolation of solar radiation Simulation of electric solar power plant generation Solar radiation forecasting Applications of solar energy and Socio-economic benefits of solar energy The

contributors present the statistical and physical models needed to derive solar radiation from satellite images and numerical models emphasising the importance of measuring solar radiation accurately They also show the classical models used to generate synthetic data clear sky models and ancillary air quality and meteorological data from different input sources Solar Resources Mapping provides industry professionals with methodologies and tools to build solar irradiance maps for different applications The book will also benefit students and researchers as it serves as a main technical reference presenting the basic terminology and fundamentals for solar resource mapping that include methods for assessing measurement uncertainty

Encyclopedia of E-Commerce Development, Implementation, and Management Lee, In, 2016-03-31 The convenience of online shopping has driven consumers to turn to the internet to purchase everything from clothing to housewares and even groceries The ubiquity of online retail stores and availability of hard to find products in the digital marketplace has been a catalyst for a heightened interest in research on the best methods techniques and strategies for remaining competitive in the era of e commerce The Encyclopedia of E Commerce Development Implementation and Management is an authoritative reference source highlighting crucial topics relating to effective business models managerial strategies promotional initiatives development methodologies and end user considerations in the online commerce sphere Emphasizing emerging research on up and coming topics such as social commerce the Internet of Things online gaming digital products and mobile services this multi volume encyclopedia is an essential addition to the reference collection of both academic and corporate libraries and caters to the research needs of graduate level students researchers IT developers and business professionals

Addiction, Modernity, and the City Christopher B.R. Smith, 2015-11-19 Examining the interdependent nature of substance space and subjectivity this book constitutes an interdisciplinary analysis of the intoxication indigenous to what has been termed our narcotic modernity The first section Drug Culture demonstrates how the body of the addict and the social body of the city are both inscribed by controlled substance Positing addiction as a pathology out of place that is specific to the late capitalist urban landscape the second section Dope Sick conducts a critique of the prevailing pathology paradigm of addiction proposing in its place a theoretical reconceptualization of drug dependence in the terms of prescription Remapping the successive stages or phases of our narcotic modernity the third section Narco State delineates three primary eras of narcotic modernity including the contemporary city of safe supervised consumption Employing an experimental intra textual format the fourth section Brain Disease mimics the sense state or scape of intoxication accompanying each permutation of narcotic modernity in the interchangeable terms of drug dream and or disease Tracing the parallel evolution of addiction the late capitalist cityscape and the pathological project of modernity the four parts of this book thus together constitute a users guide to urban space
