Modern Trends in Diatom Identification Gabriel Cristóbal, Saúl Blanco, Gloria Bueno, 2020-05-28 High resolution images of phytoplankton cells such as diatoms or desmids which are useful for monitoring water quality can now be provided by digital microscopes facilitating the automated analysis and identification of specimens Conventional approaches are based on optical microscopy however manual image analysis is impractical due to the huge diversity of this group of microalgae and its great morphological plasticity As such there is a need for automated recognition techniques for

diagnostic tools e.g. environmental monitoring networks, early warning systems to improve the management of water resources and decision making processes. Describing the entire workflow of a bioindicator system from capture, analysis and identification to the determination of quality indices, this book provides insights into the current state of the art in automatic identification systems in microscopy. Landscapes of Human Evolution James Cole, John McNabb, Matt Grove, Rob Hosfield, 2020-02-13. Fourteen papers are presented here in honour of John Gowlett. John has a wide range of research interests primarily focused on the human genus *Homo* and is a world leader in understanding the cognitive and behavioural preconditions necessary for the emergence of complex behaviours such as language and art. ECMLG 2017 13th European Conference on Management, Leadership and Governance Martin Rich, 2017-12-11. These Proceedings represent the work of contributors to the 13th European Conference on Management, Leadership and Governance. ECMLG 2017 hosted this year by the Cass Business School, City University of London on 11-12 December 2017. The Conference Chair is Dr Martin Rich. The conference will be opened with a keynote address by Dr Helen Rothberg from Marist College, Poughkeepsie, USA with a speech entitled 'Everything I Know about Leadership I Learned as a Bartender'. On the second day the keynote will be delivered by Dr Amanda Goodall from City University of London on the topic of 'Why we need core business experts as leaders'. ECMLG is a well-established platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in many different branches of Management, Leadership and Governance. At the same time it provides an important opportunity for members of the community to come together with peers, share knowledge and exchange ideas. With an initial submission of 160 abstracts, after the double-blind peer review process, there are 61 academic papers: 8 PhD Papers and 2 Work in Progress papers in these Conference Proceedings. These papers reflect the truly global nature of research in the area, with contributions from Australia, Austria, Belgium, Brazil, Canada, Czech Republic, Finland, Germany, Hungary, Iran, Ireland, Israel, Kazakhstan, Kenya, Lithuania, Malaysia. Freshwater Fisheries Ecology John F. Craig, 2015-11-09. Inland fisheries are vital for the livelihoods and food resources of humans worldwide, but their importance is underestimated, probably because large numbers of small local operators are involved. Freshwater Fisheries Ecology defines what we have globally, what we are going to lose and mitigate for, and what, given the right tools, we can save. To estimate potential production, the dynamics of freshwater ecosystems (rivers, lakes and estuaries) need to be understood. These dynamics are diverse, as are the Earth's freshwater fisheries resources, from boreal to tropical regions, and these influence how fisheries are both utilized and abused. Three main types of fisheries are illustrated within the book: artisanal, commercial and recreational, and the tools which have evolved for fisheries governance and management, including assessment methods, are described. The book also covers in detail fisheries development, providing information on improving fisheries through environmental and habitat evaluation, enhancement and rehabilitation, aquaculture, genetically modified fishes and sustainability. The book thoroughly reviews the negative impacts on fisheries, including excessive harvesting, climate change

toxicology impoundments barriers and abstractions non native species and eutrophication Finally key areas of future research are outlined Freshwater Fisheries Ecology is truly a landmark publication containing contributions from over 100 leading experts and supported by the Fisheries Society of the British Isles The global approach makes this book essential reading for fish biologists fisheries scientists and ecologists and upper level students in these disciplines Libraries in all universities and research establishments where biological and fisheries sciences are studied and taught should have multiple copies of this hugely valuable resource About the Editor John Craig is Editor in Chief of the Journal of Fish Biology and has an enormous range of expertise and a wealth of knowledge of freshwater fishes and their ecology having studied them around the globe including in Asia North America Africa the Middle East and Europe His particular interests have been in population dynamics and life history strategies He is a Fellow of the Linnean Society of London and the Royal Society of Biology

Ecological Informatics Friedrich Recknagel, William K. Michener, 2017-09-21 This book introduces readers to ecological informatics as an emerging discipline that takes into account the data intensive nature of ecology the valuable information to be found in ecological data and the need to communicate results and inform decisions including those related to research conservation and resource management At its core ecological informatics combines developments in information technology and ecological theory with applications that facilitate ecological research and the dissemination of results to scientists and the public Its conceptual framework links ecological entities genomes organisms populations communities ecosystems landscapes with data management analysis and synthesis and communicates new findings to inform decisions by following the course of a loop In comparison to the 2nd edition published in 2006 the 3rd edition of Ecological Informatics has been completely restructured on the basis of the generic conceptual framework provided in Figure 1 It reflects the significant advances in data management analysis and synthesis that have been made over the past 10 years including new remote and in situ sensing techniques the emergence of ecological and environmental observatories novel evolutionary computations for knowledge discovery and forecasting and new approaches to communicating results and informing decisions

Historical Dictionary of South Africa Christopher Saunders, Peter Limb, 2020-12-15 As the most influential and powerful country on the entire continent of Africa an understanding of South Africa's past and its present trends is crucial in appreciating where South Africans are going to and from where they have come South Africa changed dramatically in 1994 when apartheid was dismantled and it became a democratic state Since 2000 when the previous edition appeared further big changes occurred with the rise of new political leaders and of a new black middle class There were also serious problems in governance in public health and the economy but with a remarkable popular resilience too This third edition of Historical Dictionary of South Africa contains a chronology an introduction and an extensive bibliography The dictionary section has more than 600 cross referenced entries on important personalities as well as aspects of the country's politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know

more about South Africa **Earth's Oldest Rocks** Martin J. Van Kranendonk, Vickie Bennett, Elis Hoffmann, 2018-09-26
Earth's Oldest Rocks Second Edition is the only single reference source for geological research of early Earth. This new edition is an up-to-date collection of scientific articles on all aspects of the early history of the Earth from planetary accretion at 4.567 billion years ago (Ga) to the onset of modern style plate tectonics at 3.2 Ga. Since the first edition was published, significant new advances have been made in our understanding of events and processes on early Earth that correspond with new advances in technology. The book includes contributions from over 100 authors, all of whom are experts in their respective fields. The research in this reference concentrates on what is directly gleaned from the existing rock record to understand how our planet formed and evolved during the planetary accretion phase, formation of the first crust, the changing dynamics of the mantle and style of tectonics, life's foothold, and early development and mineral deposits. It is an ideal resource for academics, students, and the general public alike. Advances in early Earth research since 2007, based primarily on evidence gleaned directly from the rock record. More than 50% of the chapters in this edition are new, and the rest of the chapters are revised from the first edition with more than 700 pages of new material. Comprehensive reviews of areas of ancient lithosphere from all over the world and of crust-forming processes. New chapters on early solar system materials, composition of the ancient atmosphere, hydrosphere, and overviews of the oldest evidence of life on Earth and modeling of early Earth tectonics. *Colonial Survey and Native Landscapes in Rural South Africa, 1850 - 1913* Lindsay F. Braun, 2014-10-16
Colonial Survey and Native Landscapes in Rural South Africa, 1850-1913 Lindsay Frederick Braun explores the technical processes and struggles surrounding the creation and maintenance of boundaries and spaces in South Africa in the nineteenth and early twentieth centuries. The precision of surveyors and other colonial technicians lent these enterprises an illusion of irreproachable objectivity and authority, even though the reality was far messier. Using a wide range of archival and printed materials from survey departments, repositories, and libraries, the author presents two distinct episodes of struggle over lands and livelihoods: one from the Eastern Cape and one from the former northern Transvaal. These cases expose the contingencies, contests, and negotiations that fundamentally shaped these changing South African landscapes. **Seismic Characterization of Carbonate Platforms and Reservoirs** J. Hendry, P. Burgess, D. Hunt, X. Janson, V. Zampetti, 2021-08-17
Modern seismic data have become an essential toolkit for studying carbonate platforms and reservoirs in impressive detail. Whilst driven primarily by oil and gas exploration and development, data sharing and collaboration are delivering fundamental geological knowledge on carbonate systems, revealing platform geomorphologies and how their evolution on millennial time scales, as well as kilometric length scales, was forced by long-term eustatic, oceanographic, or tectonic factors. Quantitative interrogation of modern seismic attributes in carbonate reservoirs permits flow units and barriers arising from depositional and diagenetic processes to be imaged and extrapolated between wells. This volume reviews the variety of carbonate platform and reservoir characteristics that can be interpreted from modern seismic

data illustrating the benefits of creative interaction between geophysical and carbonate geological experts at all stages of a seismic campaign Papers cover carbonate exploration including the uniquely challenging South Atlantic pre salt reservoirs seismic modelling of carbonates and seismic indicators of fluid flow and diagenesis Corrupted Jonathan D Jansen, 2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly *Mintirho ya Vulavula* Jabulisile Mhlambi, Sandile Ngidi, 2021-04-19 *Mintirho ya Vulavula* Arts National Identities and Democracy examines the role of arts and culture in development and specifically its value in consolidating our nascent democracy and in facilitating the transformation of South African society Contributors to this edited volume interrogate the role of arts culture and heritage from a transdisciplinary perspective enriched by the cross generational perspectives offered by young and older artists cultural practitioners activists and scholars Authors also offer some policy recommendations on how the contribution of arts and culture to social cohesion and nation building can be enhanced
