Sweeney,Stephanie R. Jones,2020-12-31 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office frontiersin.org about contact *Scientific and Technical Aerospace Reports* ,1991 Modulation of NMDA Receptors: From Bench Side to Clinical Applications in Psychiatry Natasa Petronijevic,Nevena V. Radonjic,Hsien-Yuan Lane,2022-05-04 *Hip and Knee Pain Disorders* Benoy Mathew,Carol Courtney,César Fernández-de-las-Peñas,2022-06-21 Hip and Knee Pain Disorders has been written to provide a state of the art evidence informed and clinically informed overview of the examination and conservative management of hip knee pain conditions Under the current predominantly evidence based practice paradigm clinician expertise patient preference and best available research determine examination and prognostic and clinical management decisions However this paradigm has been understood by many to place greater value and emphasis on the research component thereby devaluing the other two Evidence informed practice is a term that has been suggested to honor the original intent of evidence based practice while also acknowledging the value of clinician experience and expertise In

essence evidence informed practice combines clinical reasoning based on current best evidence with authority based knowledge and a pathophysiological rationale derived from extrapolation of basic science knowledge Unlike other published textbooks that overemphasize the research component in decision making this book aims to address the clinical reality of having to make decisions on the management of a patient with hip knee pain in the absence of a comprehensive scientific rationale using other sources of knowledge It offers an evidence informed textbook that values equally research evidence clinician expertise and patient preference The book is edited by three recognised world leaders in clinical research into manual therapy and chronic pain Their research activities are concentrated on the evidence based management of musculoskeletal pain conditions using conservative interventions For this book they have combined their knowledge and clinical expertise with that of 54 additional contributors all specialists in the field The contributors include a mix of clinicians and clinician researchers Hip and Knee Pain Disorders is unique in bringing together manual therapies and exercise programs in a multimodal approach to the management of these pain conditions from both a clinical but also evidence based perspective It acknowledges the expanding direct access role of the physical therapy profession The book provides an important reference source for clinicians of all professions interested in conservative management of the hip and knee regions It will also be useful as a textbook for students at both entry and post graduate level *Thinking about Bribery* Philip M. Nichols,Diana C. Robertson,2017-09-07 Bribery is perhaps the most visible and most frequently studied form of corruption Very little research however examines the individual decision to offer or accept a bribe or how understanding that decision can help to effectively control bribery This book brings together research by scholars from a variety of disciplines studying the mind and morality who use their research to explain how and why decisions regarding participation in bribery are made It first examines bribery from the perspective of brain structure then approaches the decision to engage in bribery from a cognitive perspective It examines the psychological costs imposed on a person who engages in bribery and studies societal and organizational norms and their impact on bribery This is an ideal read for scholars and other interested persons studying business ethics bribery and corruption corruption control and the applications of neuroscience in a business environment Noise-induced hearing loss: From basic to clinical research Zhiwu Huang,Wei Qiu,Hui Wang,Bin Ye,Vicky Zhang,2023-04-13
