Estate Market in Ghana Wilfred K. Anim-Odame, 2021-03-15 This book seeks to fill the information gap on a key emerging real estate market and demystify the perception that the market in Ghana and indeed across sub Saharan Africa is opaque. Drawing on decades of experience from within the market the author presents a detailed examination of the real estate market in Ghana and its existing regulatory framework. In doing so he provides a justification for its relevance in the subregion. It focuses on seven thematic areas: land administration, legal perspectives, market dynamics, investment potentials, market competitiveness, valuation and compensation. This book will be a useful resource for students, academia, practitioners, real estate developers, investors and professional advisors such as valuers, surveyors, lawyers, accountants, bankers, architects, planners and engineers. An important feature of this book is the way in which chapters are self contained and yet follow logically one from another. With this approach readers can choose a reading path appropriate to their own specific needs without a loss of continuity.

ASEAN and Regional Free Trade Agreements Christopher Findlay, 2015-07-16 Efforts to use existing trade agreements to build a larger regional agreement face many challenges. This book considers this problem with reference to ASEAN's current agreements with key partners and the interest to build the Regional Comprehensive Economic Partnership (RCEP). The analysis of the options is framed by a focus on the use of supply chains in international business. Issues considered include those related to reductions in tariffs, trade facilitation, the treatment of investment and of services and the definition of rules of origin. The work is informed by case studies of supply chains in automobile and electronics and in a professional service sector. The book provides a set of priority actions for better progress in taking a bottom up approach to building RCEP.
