Managing Your Software Project Ian Ricketts, 2012-12-06 About this Book I wrote this book to help students who are about to start their first project It provides guidance on how to organise your work so that you achieve your agreed objective The advice is based on experience gained from supervising more than 50 successful student projects in both engineering and computer science during the last 10 years Projects have varied in duration from 120 hour final year undergraduate projects through 800 hour MSc projects and up to 5000 hour PhD student research projects It is my experience that almost all students have the technical background to a greater or lesser extent to complete their assigned project but that a disappointingly large number lack the basic organisational framework Once they are introduced to the rudiments of project management then they are better equipped to control their own progress They can also concentrate their efforts more effectively on the technical challenges which they will inevitably meet Of course you can improve your skills solely on the basis of personal experience but you are more likely to achieve your objectives in a timely manner with the help of an experienced guide That is what I have tried to include within this book It contains advice on how to solve some of the organisational challenges common to all projects so that you can successfully complete your project

Research to Empower: A Vibrant Guidebook for Young Students Grace Chenxin Liu, 2024-01-30 With prevalent misinformation the rise of social media and artificial intelligence writing for us we live in an era where learning research techniques and processes is needed more than ever to differentiate between true and false statements Research also leads to new knowledge creativity and innovation Most importantly it empowers young people to pursue their interests solve crucial problems and master a set of essential irreplaceable skills like critical reasoning in depth thinking and communication Unsurprisingly there is a huge demand for students to learn how to research However there is a lack of guidebooks with engaging and illuminating content that appropriately introduces research to young students How can we help those with the potential to come up with amazing possibly world changing ideas if they don't know where when or how to start How do we make sure they get the resources they need Grace Chenxin Liu shares her knowledge about conducting research as a student with step by step guidance delivering honest and effective tips that empower young students to do excellent research Are you ready Let's begin and don't forget if Grace can do it everyone can do it too
