Guillén,2025-09-23 AN INTERNATIONAL BESTSELLER Wall Street Journal Bestseller A Porchlight Book Bestseller Financial Times Best Books of 2020 Yahoo Finance Favorite Business Books of 2020 JP Morgan NextList 2021 selection Bold provocative illuminates why we re having fewer babies the middle class is stagnating unemployment is shifting and new powers are rising ADAM GRANT The world is changing drastically before our eyes will you be prepared for what comes next A groundbreaking analysis from one of the world s foremost experts on global trends including analysis on how COVID 19 will amplify and accelerate each of these changes Once upon a time the world was neatly divided into prosperous and backward economies Babies were plentiful workers outnumbered retirees and people aspiring towards the middle class yearned to own homes and cars Companies didn t need to see any further than Europe and the United States to do well Printed money was legal tender for all debts public and private We grew up learning how to play the game and we expected the rules to remain the same as we took our first job started a family saw our children grow up and went into retirement with our finances secure That world and those rules are over By 2030 a new reality will take hold and before you know it There will be more grandparents than grandchildren The middle class in Asia and Sub Saharan Africa will outnumber the US and Europe combined The global economy will be driven by the non Western consumer for the first time in modern history There

will be more global wealth owned by women than men There will be more robots than workers There will be more computers than human brains There will be more currencies than countries All these trends currently underway will converge in the year 2030 and change everything you know about culture the economy and the world According to Mauro F Guillen the only way to truly understand the global transformations underway and their impacts is to think laterally That is using peripheral vision or approaching problems creatively and from unorthodox points of view Rather than focusing on a single trend climate change or the rise of illiberal regimes for example Guillen encourages us to consider the dynamic inter play between a range of forces that will converge on a single tipping point 2030 that will be for better or worse the point of no return 2030 is both a remarkable guide to the coming changes and an exercise in the power of lateral thinking thereby revolutionizing the way you think about cataclysmic change and its consequences
