Law and the Bible Robert F. Cochran,David VanDrunen,2013-09-01 The Bible is full of law Yet too often Christians either pick and choose verses out of context to bolster existing positions or assume that any moral judgment the Bible expresses should become the law of the land Law and the Bible asks What inspired light does the Bible shed on Christians participation in contemporary legal systems It concludes that more often than not the Bible overturns our faulty assumptions and skewed commitments rather than bolsters them In the process God gives us greater insight into what all of life including law should be Each chapter is cowritten by a legal professional and a theologian and focuses on a key aspect of the biblical witness concerning civil or positive law that is law that human societies create to order their communities implementing and enforcing it through civil government A foundational text for legal professionals law and prelaw students and all who want to think in a faithfully Christian way about law and their relationship to it

Good Neighbors Nancy L. Rosenblum, 2018-05-22 The moral principles prescribed for friendship civil society and democratic public life apply imperfectly to life around home where we interact day to day without the formal institutions rules of conduct and means of enforcement that guide us in other settings This work explores how encounters among neighbours create a democracy of everyday life which has been with us since the beginning of American history and is expressed in settler immigrant and suburban narratives and in novels poetry and popular culture

From Foreign Natives to Native Foreigners. Explaining Xenophobia in Post-apartheid South Africa Michael Neocosmos, 2010-06-01 The events of May 2008 in which 62 people were killed simply for being foreign and thousands were turned overnight into refugees shook the South African nation This book is the first to attempt a comprehensive and rigorous explanation for those horrific events It argues that xenophobia should be understood as a political discourse and practice As such its historical development as well as the conditions of its existence must be elucidated in terms of the practices and prescriptions which structure the field of politics In South Africa the history of xenophobia is intimately connected to the manner in which citizenship has been conceived and fought over during the past fifty years at least Migrant labour was de nationalised by the apartheid state while African nationalism saw the same migrant labour as the foundation of that oppressive system Only those who could show a family connection with the colonial and apartheid formation of South Africa could claim citizenship at liberation Others were excluded and seen as unjustified claimants to national resources Xenophobias conditions of existence the book argues are to be found in the politics of post apartheid nationalism where state prescriptions founded on indigeneity have been allowed to dominate uncontested in conditions of an overwhelmingly passive conception of citizenship The de politicisation of an urban population which had been able to assert its agency during the 1980s through a discourse of human rights in particular contributed to this passivity Such state liberal politics have remained

largely unchallenged As in other cases of post colonial transition in Africa the hegemony of xenophobic discourse the book contends is to be sought in the specific character of the state consensus
