Jackson, 2022-02-09 This book is about the promotion of all attainment teaching in the mathematics classroom The book contains the individual stories of six teachers working in three different schools an inner London comprehensive with a largely working class intake a comprehensive on the south coast and a rural comprehensive in Cambridgeshire Each story describes and explains in brief the background of the teacher and how each came to teach all attainment groups in mathematics The research reported in this book is the only close examination and analysis of the practices and methodologies of successful all attainment educators in the modern age Three major themes are identified and examined what sustains the teachers how they introduce develop and maintain all attainment teaching and how they make all attainment work in the classroom From an analysis of these findings the book presents two interrelated models of the knowledge and understandings the research has generated The first one is an overarching model of situation and horizon Used as a means of visualizing and understanding the current situation for teachers it can aid in encouraging change for the better The second model offers teachers a way to think of all attainment teaching as an enabler for all students most especially for disadvantaged students Both models have original and explanatory power and offer new ways of conceptualizing how mathematics teaching for social justice might be understood and implemented offering fresh perspectives and unique insights As such it will be of help to students at undergraduate Masters and doctoral level and to education researchers more widely

Primary Mathematics and the Developing Professional Alison Millett, Margaret Brown, Mike Askew, 2007-07-11 Abstract This introduction sets the scene for the remainder of the book by considering first the international context of widespread concern about the improvement of numeracy skills This is related to reform movements in the United Kingdom the United States and other countries aimed at modernising primary elementary school mathematics curricula A detailed account is given of the National Numeracy Strategy in England a systemic government imposed response to concern about standards implemented in 1999 2000 This includes a discussion of the alternative meanings of numeracy An earlier initiative sponsored by a United Kingdom charitable trust reacting to concern about primary numeracy was the Leverhulme Numeracy Research Programme This large scale longitudinal study and linked set of case study projects focusing on reasons for low attainment took place during 1997 2002 This book and each other in the same series is based on results of that research The timescale fortuitously enabled the research team to also report on some effects of the systemic reform in the National Numeracy Strategy

1 THE INTERNATIONAL CONTEXT In many countries there are recurring periods of national concern about the low standards of calculation skills shown by children in primary elementary schools Recently these concerns have become more urgent and more political with the publication of international comparisons of mathematical achievement first at secondary and more recently at primary level e g Lapointe Mead Mullis et al 1997
