

The background of the entire image is a photograph of a desert landscape. In the foreground, there is a rocky, reddish-brown ground. In the middle ground, several tall, isolated rock formations (buttes) rise from the desert floor. The buttes have a weathered, layered appearance. The sky above is a clear, bright blue with a few wispy clouds. The text is overlaid on this image.

Adjutant-General's Office, *Journeys West* Virginia Kerns,2010-03-01 *Journeys West* traces journeys made during seven months of fieldwork in 1935 and 1936 by Julian Steward a young anthropologist and his wife Jane Virginia Kerns identifies the scores of Native elders whom they met throughout the Western desert men and women previously known in print only by initials and thus largely invisible as primary sources of Steward s classic ethnography Besides humanizing Steward s cultural informants revealing them as distinct individuals and also as first generation survivors of an ecological crisis caused by American settlement of their lands Kerns shows how the elders worked with Steward Each helped to construct an ethnographic portrait of life in a particular place in the high desert of the Great Basin The elders memories of how they and their ancestors had lived by hunting and gathering a sustainable way

of life that endured for generations richly illustrated what Steward termed cultural adaptation. It later became a key concept in anthropology and remains relevant today in an age of global environmental crisis. Based on meticulous research, this book draws on an impressive array of evidence from interviews and observations to census data correspondence and the field journal of the Stewards Journeys West. It illuminates not only on the elders who were Steward's guides but also the practice of ethnographic fieldwork, a research method that is both a journey and a distinctive way of looking, listening, and learning.

Western Places, 1992 **Area 51 - Black Jets / Chinese (Simplified) / China; Hong Kong** Bill Yenne, 2018-02-20

Area 51's most important military aviation developments are profiled in an illustrated format. When most of us think of Area 51, we think of aliens, UFOs, and controversial government cover-ups. It's easy to forget that since the mid 1950s, the United States' famed extension of Edwards Air Force Base has served as a top secret CIA testing ground for many of the most groundbreaking advancements in American military aviation technology. In *Area 51 Black Jets*, author and military historian Bill Yenne offers the first fully illustrated chronology of Area 51's most famous aircraft projects, including Lockheed's U-2 Dragon Lady and SR-71 Blackbird reconnaissance planes, drones ranging from the early Lockheed D-21 to the modern-day General Atomics MQ-1 Predator, and the famous F-117 Nighthawk stealth fighter produced by the Have Blue program during the 1970s. Each project is given its own fascinating chapter, illuminating the aircraft's development at this famed location. But beyond the aircraft themselves, *Area 51 Black Jets* also covers a handful of the many classified experimental programs carried out at Area 51 over the years, such as Have Doughnut, Have Ferry, and Have Drill, secret undertakings that successfully reverse-engineered such enemy aircraft as the Russian MiG during the Cold War. Presented in beautiful hardcover format and illustrated with historic color and black and white photographs, diagrams, and maps, this book reveals Area 51 for what it truly is: a clandestine area for the United States' most cutting-edge technological innovators in military aviation. This intriguing anthology examines incidents that were so puzzling they led witnesses to draw one inevitable conclusion: that aliens really do exist. Inside, you will discover some of the most mysterious reports of UFO sightings, close encounters, and alien abductions from across the globe. *Mobil 98: California and the West* Fodor's, Fodor's Travel Publications, Inc.

Staff, 1998. Four hundred years after Kepler discovered his third law of planetary motion, disproving the Pythagorean notion of the music of the spheres, music was discovered in the Sun. With this discovery, the science of helioseismology was born. In *Music of the Sun*, renowned helioseismologist William Chaplin tells the story of this discipline's origins and gives us invaluable insight into its implications, not only for better understanding the distant sun and stars but for climate change, particle physics, and the very relationship between the Sun and the Earth. **BOOK JACKET**
