SENSORY HAIR CELL DEATH AND REGENERATION, 2nd Edition Michael E. Smith,Andrew K. Groves,Allison B. Coffin,2025-01-23 Sensory hair cells are the mechanosensory receptors of the auditory and vestibular systems in all vertebrates and of the lateral line system of some aquatic vertebrates Hair cells can be damaged and lost due to such factors as aging ototoxic chemicals acoustic trauma infection or genetic factors Loss of these hair cells lead to deficits in hearing and balance and in mammals such deficits are permanent In contrast non mammalian vertebrates exhibit the capability to regenerate missing hair cells Researchers have been examining the process of hair cell death and regeneration in animal models in an attempt to find ways of either preventing hair cell loss or stimulating the production of new hair cells in mammals with the ultimate goal of finding new therapeutics for human sensorineural hearing and balance deficits This has led to a wide array of research on hair cells such as understanding the factors that cause hair cell loss and finding agents that protect them from damage elucidating the apoptotic pathways activated during hair cell death examining the genes and cellular pathways that are regulated during the process of hair cell death and regeneration and characterizing the functional sensory loss and recovery following hair cell death and regeneration This research has involved cell and developmental biologists physiologists geneticists bioinformaticians and otolaryngologists In this Research Topic we wish to summarize and review recent progress of hair cell regeneration research and collate original articles advancing sensory hair cell death and regeneration research into the future

Multi-targeted Natural Products as Cancer Therapeutics: Challenges and Opportunities, Volume I, 2nd edition
 Jiang-Jiang Qin, Wei-Dong Zhang, Huizi Jin, Sanjay K. Srivastava, 2024-01-11 This Research Topic is part of a series with Multi
 targeted Natural Products as Cancer Therapeutics Challenges and Opportunities Volume II Cancer remains a leading cause
 of disease related deaths worldwide despite recent advances in our understanding of cancer initiation progression and
 metastasis Chemotherapy and radiotherapy have been used as standard non surgical treatments of human cancer for
 decades however the survival rates of patients with cancer especially those with advanced diseases are still very low due to
 the high toxicities of these treatments as well as the severe side effects This fact has motivated researchers to discover new
 cancer therapeutics with minimum side effects which intensively promotes the rapid development of single specific molecule
 targeted therapies SSMITT Many efforts have been made in world wide cancer drug discovery research and several single
 molecule targeted therapies have been successfully developed Unfortunately most of the investments failed because cancer
 is a genetic disease and always harbors multiple alternations of molecules or genes at the genomic genetic and epigenetic
 levels The inhibition of a single molecule or signaling pathway by SSMITT frequently results in a hyperactive compensation of
 other cancer related molecules and signaling pathways as well as the subsequent development of drug resistance Therefore
 identifying multi targeted therapies i.e. drugs that are able to target multiple cancer related genes proteins or signaling
 pathways is a more promising way to success in developing new cancer therapeutics Natural products especially those from
 traditional Chinese medicine and folk remedies in other countries are an extraordinarily important source for new drug
 discovery over the past decades Of note many natural products have often been demonstrated to target several crucial genes
 or proteins in cancer related signaling networks and exert synergistic effects For example Japonicone A a dimeric
 sesquiterpenoid from the medicinal plant *Inula japonica* has been found to inhibit tumor growth and metastasis by dually
 targeting the TNF NF B and p53 MDM2 signaling pathways Traditionally researchers have believed that the multi targeting

mechanisms of natural products have limited their use in cancer treatment due to the low specificity and potential side effects. The growing interest in developing multi-targeted cancer therapies may provide another golden opportunity to develop natural products as new cancer therapeutics. Nevertheless, critical investigations for a comprehensive understanding of the molecular mechanisms of natural products also mean more challenges. Our long-term goals are to fully understand the molecular targets and mechanisms of action of anticancer natural products and develop them as novel cancer preventive and therapeutic agents. The specific goal of this Research Topic is to bring together the recent findings of newly identified anticancer natural products, especially those with multiple molecular targets. Papers, Original Research articles, or Reviews which discuss the in vitro and in vivo efficacy and pharmacological and toxicological properties of natural products are also welcome to be submitted.

Guidelines for the conception and review of submissions

As many anticancer drugs working as cytotoxic compounds have non-selective effects, annihilating their potential therapeutic benefits, manuscripts are advised to provide evidence of a significant selectivity towards cancer cells vs. healthy cells. Specifically, if the studied anticancer drug or modality does not target an oncogenic pathway, the authors should make every effort possible to prove that the cytotoxic or cytostatic effects they have identified exhibit selectivity for cancer cells, ideally 1 log difference in EC₅₀ or IC₅₀ vs. non-malignant cells, e.g., fibroblasts or primary culture of cells. The authors should also demonstrate the applicability of their anticancer modalities on a minimum of two well-authenticated cancer cell lines, ideally originating from distinct organs/tissues. For manuscripts dealing with plant extracts or other natural substances, the composition and the stability of the study material must be described in sufficient detail. In particular, for extracts, chromatograms with characterization of the dominating compounds are requested. The level of purity must be proven and included. Please refer to the Four Pillars of Best Practice in Ethnopharmacology, a subset of which concerning general standards in natural product research are applied to all such studies in all sections of *Frontiers in Pharmacology*.

Top Notch 1 Activ Second Edition Introduction

In today's digital age, the availability of Top Notch 1 Activ Second Edition books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Top Notch 1 Activ Second Edition books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Top Notch 1 Activ Second Edition books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Top Notch 1 Activ Second Edition versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Top Notch 1 Activ Second Edition books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Top Notch 1 Activ Second Edition books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Top Notch 1 Activ Second Edition books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making

them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Top Notch 1 Activ Second Edition books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Top Notch 1 Activ Second Edition books and manuals for download and embark on your journey of knowledge?
