Daily Graphic Yaw Boadu-Ayeboafah, 2006-06-06 HWM , 2006-07 Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews Mobile Web Services Ariel Pashtan, 2005-04-21
Publisher Description **Mobile Messaging Technologies and Services** Gwenaël Le Bodic, 2003-06-13 Mobile messaging is practically the first data communication service in the wireless domain. It is a major advance on the conventional practice of providing only voice communication service over the wireless interface. Thus mobile messaging is the initial step to bring the Internet to wireless terminals and has considerable importance both for mobile communication and the Internet. Mobile Messaging provides an in depth description of messaging technologies supported by mobile networks. It covers the Short Message Service (SMS), Enhanced Messaging Service (EMS) through to the more complex and emerging Multimedia Messaging Service (MMS). The Short Message System (SMS) has proved to be incredibly popular and is supported by most GSM, TDMA and CDMA mobile networks. This volume focuses on the Short Message Service introduced by the European Telecommunications Standard Institute (ETSI) for GSM and GPRS networks. On the basis of ETSI standard the 3rd Generation Partnership Project (3GPP) is currently the organisation responsible for maintaining the SMS technical specifications. In its most basic form the Short Messaging Service allows users to exchange short messages composed of a limited amount of text and it is expected that up to 100 Billion short messages could be exchanged monthly by the end of 2002. The Enhanced Message Service (EMS) an application level extension of SMS supersedes basic SMS features by allowing elements such as images, animations, formatted text and monophonic melodies to be inserted in short or concatenated messages. Recently the 3GPP has been focusing on the development of the Multimedia Message Service (MMS). MMS features include the exchange of messages containing polyphonic melodies, large images, video elements, sometimes organised with a multimedia presentation language such as SMIL or xHTML. MMS will be supported by 2.5 G and 3G networks. MMS specifications have reached a fairly mature stage and MMS commercial solutions are appearing on the market. Unlike EMS, MMS has been specified by the 3GPP as a service independent from the underlying network technologies. In parallel to the 3GPP standardisation process, other organisations have specified network specific implementations of MMS such as the WAP implementation defined by the WAP Forum. In order to develop applications using Short Enhanced and Multimedia messaging technologies, engineers have to become familiar with the use of technical specifications produced by various standard development organisations such as the 3GPP, the WAP Forum and the IETF, and this is the first book to pull this vast array of material together. Provides an in depth description of the different messaging services and messaging technologies. Presents an introduction to mobile networks. Features numerous practical implementation examples. Provides a unique, easy to follow presentation of messaging services and mobile networks within a single publication. Essential reading for content providers, service providers, network operators and telecommunications manufacturers, researchers, postgraduate students, marketing and standardisation personnel.

Achieving the Circular Economy Jenny Palm, Nancy Bocken, 2021-05-20 Urbanisation and climate change are pushing cities to find novel pathways leading to a sustainable future The urban context may be viewed as a new experimentation space to accelerate the transition to a circular economy Urban symbiosis and the circular economy are emerging concepts attracting more and more attention within the urban context Moreover new business models are emerging around sharing and peer to peer practices which are challenging existing roles of actors in society These developments are having an important impact on the flows of resources and the use of the city infrastructure and each research area has taken a different perspective in the analysis of such impacts This Special Issue aims to explore what a circular city could constitute and how and why cities engage in circularity This Special Issue includes seven high quality papers on the theories and practices of circular cities Actors concepts methods tools the barriers to and enablers of circular cities are discussed and a solid base and inspiration for the future development of circular cities are provided **Daily Graphic** Ransford Tetteh, 2008-12-18
