Daily Routines to Jump-Start Geometry, Measurement, and Data, Grades K-5 John J. SanGiovanni,Dennis McDonald,2025-06-03 Geometry measurement

and data aren't just math topics they're fundamental skills for understanding the world around us. Geometry, measurement, and data concepts play a major role in everyday life. Yet when it comes to teaching math in the elementary grades, these concepts can be overshadowed by other content like number concepts, computation, or fractions. Instead, what if these ideas about measurement, geometry, and data were connected to number and computation? What if they were featured content for bursts of engagement, reasoning, and discussion? The bite-sized routines in this guide are just that. The routines in this book are perfect for teachers looking for interesting and doable daily practice that engage students in geometry, measurement, and data to foster reasoning, critical thinking, and sense-making. Daily Routines to Jump Start Geometry, Measurement, and Data, Grades K-5, provides routines that are practical, easy to implement, and meant for quick engagements to ignite thinking and reasoning skills while being adaptable to various content. Fortified with standards for math practices and processes, this book provides a collection of 20 routines with extensions and modifications for measurement, data, and geometry. Where's the Wonder in Elementary Math? Judith McVarish, 2012-08-21. This book argues that even in today's high-stakes testing environment, teaching to the test need not be teachers' only focus as they introduce young children to mathematics. Judith McVarish demonstrates how building a community of learners and using problem-solving to engage students can help teachers encourage students' disposition to creative thinking and reasoning skills that can otherwise become lost due to the pressure of the many other expectations placed upon both teachers and students. This book offers strategies for infusing mathematics learning and reasoning into elementary school classrooms while meeting curriculum and testing mandates. The teacher-researcher component of each chapter provides a vehicle for teachers to bring their own expertise and questions back into the teaching and learning equation.

Getting to the Common Core Sharon L. Spencer, Sandra Vavra, 2015-01-01. The Common Core Standards have recently been adopted in most states across the nation, and teachers are in the process of getting to the core of these standards. Teaching to standards is not a new concept; teachers have adapted to new standards every few years for quite some time. And teachers are adaptable, as can be seen in this book. We are writing this book to demonstrate how teachers use research-based strategies to meet Common Core Standards while still focusing on students. Our goal is to help teachers visualize students in action as other teachers describe the implementation of research.

based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Values of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research
