one volume this authoritative reference presents a current comprehensive overview of intellectual and cognitive assessment with a focus on practical applications. Leaders in the field describe major theories of intelligence and provide the knowledge needed to use the latest measures of cognitive abilities with individuals of all ages from toddlers to adults. Evidence-based approaches to test interpretation and their relevance for intervention are described. The book addresses critical issues in assessing particular populations including culturally and linguistically diverse students, gifted students, and those with learning difficulties and disabilities in today's educational settings. New to This Edition: Incorporates major research advances and legislative and policy changes. Covers recent test revisions plus additional tests: the NEPSY II and the Wechsler Nonverbal Scale of Ability. Expanded coverage of specific populations: chapters on autism spectrum disorders, attention deficit hyperactivity disorder, sensory and physical disabilities, and traumatic brain injury and intellectual disabilities. Chapters on neuropsychological approaches, assessment of executive functions, and multi-tiered service delivery models in schools.

*Reading in a Second Language* William Grabe, Junko Yamashita, 2022-09-08 This updated second edition provides a comprehensive overview of research into reading and how this can be applied in practice. *Research Relating to Children*, 1978. Clinical Assessment of Child and Adolescent Intelligence Randy W. Kamphaus, 2019-06-11 This volume now in its second edition has been completely updated to provide the most comprehensive and accessible handbook of practices and tools for the clinical assessment of child and adolescent intelligence. Designed specifically as a teaching tool, it provides students with an accessible guide to interpretation and applies the same interpretive systems across many tests. It emphasizes the proper interpretation of intelligence tests within the context of a child's life circumstances and includes several devices to enhance the logical processes of assessment, beginning with test selection and concluding with the reporting of results. In addition, *Clinical Assessment of Child and Adolescent Intelligence* stresses the importance of the interpretive process over the value of specific tests. Fosters a deeper understanding of the intelligence construct. Emphasizes learning by example using valuable case studies and vignettes designed to provide students with concrete models to emulate. This edition covers all facets of intelligence testing, including detailed explanations of test interpretation theory, research, and the full range of testing options for preschoolers through adult clients. New chapters have been introduced on neuropsychological approaches, adolescent and adult intelligence, including coverage of WAIS III and KAIT, and achievement and intelligence screeners have been added. And although designed primarily as a text for beginning graduate students, the book is also useful as a refresher for clinicians who are looking for updated assessment information.
