Wood, 2022-05-03 How should Christians address specific problems controversies and crises in communication today By looking at influential Christian thinkers throughout history we can identify wisdom that enriches us today in practical ways Words and Witnesses explores various influential Christian thinkers and theologians from across church history in order to expand our contemporary conversations in communication studies and media theory Individual chapters written by contributing scholars focus on major Christian thinkers starting with Athanasius St Augustine and John Chrysostom moving through the Middle Ages to address figures such as Anselm Nicholas of Cusa Teresa of Lisieux and arriving in the present with reflections on the work of John Howard Yoder C S Lewis Martin Luther King Jr Abraham Kuyper and Desmond Tutu among others Each chapter delves into how the contemporary church and scholars of media can turn to these influential Christian thinkers as resources for addressing specific problems in communication today By analyzing church practices doctrine and biblical texts this book provides the church with resources and inspiration to communicate in distinctly Christian ways **Digination** Robert C. MacDougall, 2012 The shift from orality to literacy that began with the invention of the phonetic alphabet and which went into high gear with Gutenberg's printing press more than 500 years ago helped make the modern world Some commentators have argued that this shift from orality to literacy marked a much broader cultural shift of cataclysmic proportions Today with everything from e mail to blogs iPods and podcasts through Google Yahoo eBay and with cutting edge smart phones we find ourselves developing relationships with these newest

communication tools that aren't simply allowing us to communicate faster farther and with more ease than ever before. We aren't just moving around ideas, data, and information at unimaginable speed and scale. Our interminglings and fusions with digital communication technologies are also altering both individual and group consciousness in fundamental ways: how we form and sustain relationships, how we think and perceive what it means to see and to feel. We are remaking human identity once more and manufacturing a new kind of culture along the way. The processes bound up in our digitization may well be consequential to the trajectory of human evolution. That time-honored trope, the notion that technology is not the problem, rather it's how people use technology, that's the problem, is shown to be wanting. Highlighting Marshall McLuhan's tetrads or laws of media as a primary tool of analysis, R. C. MacDougall argues in line with other media ecologists that it's not so much how we use certain tools that matters; it's that we use them. More than any other technological form, perhaps, communication technologies play particularly powerful and systemic roles in our culture or any culture, for that matter. Late adopters and even abstainers are not exempt from the psychological, social, and cultural effects and side effects of modern digital communication technology. While there are certainly varying degrees of immersion, that is to say, while some of us live in the high-rise downtown district, some at the city limits, and still others out in the proverbial woods, we all live in Digitization today.
