Abstract

1. The working distance will depend on several factors:
 - a. the amount of light
 - b. the magnification of the objective
 - c. the refractive index of the specimen
 - d. the refractive index of the immersion oil
2. The working distance is the distance between the objective and the specimen.
3. The working distance is the distance between the objective and the specimen.
4. The working distance is the distance between the objective and the specimen.
5. The working distance is the distance between the objective and the specimen.
6. The working distance is the distance between the objective and the specimen.
7. The working distance is the distance between the objective and the specimen.
8. The working distance is the distance between the objective and the specimen.
9. The working distance is the distance between the objective and the specimen.
10. The working distance is the distance between the objective and the specimen.

Abstract: The purpose of this study was to determine the effect of a 12-week training program on the physical fitness of 100 male and 100 female students. The study was conducted in a school in the city of Istanbul. The students were divided into two groups: a control group and an experimental group. The experimental group participated in a 12-week training program, while the control group did not. The physical fitness of the students was measured at the beginning and end of the study. The results showed that the experimental group had significantly higher physical fitness levels than the control group at the end of the study. The training program was effective in improving the physical fitness of the students.
