Verizon Fios Customer Service Problems:

Disconnected Debbie J. Goldman, 2024-08-20 Call center employees once blended skill and emotional intelligence to solve customer problems while the workplace itself encouraged camaraderie and job satisfaction Ten years after telecom industry deregulation management had isolated the largely female workforce in cubicles imposed quotas to sell products and installed surveillance systems that tracked every call and keystroke Debbie J Goldman explores how call center employees and their union fought for good humane jobs in the face of degraded working conditions and lowered wages As the workforce coalesced to resist the changes it demanded the Communications Workers of America CWA fight for safe and secure good paying jobs But trends in technology capitalism and corporate governance combined with the decline of unions narrowed the negotiating options for workers Goldman describes how the actions of workers management and policymakers shaped the social impact of the new digital technologies and gave new form to the telecommunications industry in a time of momentous change Perceptive and nuanced *Disconnected* tells an overlooked story of service workers in a time of change **The**

Broadband Problem Charles H. Ferguson, 2004-04-21 As the Internet revolution continues to unfold and transform telecommunications pressure is building for faster less expensive and more widely accessible broadband service Such a development would facilitate improved and less expensive traditional applications such as voice telephony and web browsing It would also enable new and useful applications such as Internet based television videoconferencing and software distribution Broadband has great potential to improve efficiency and productivity even to improve national security in some cases Broadband service and affordability however have consistently lagged well behind demand and progress in information technology with damaging results The Internet revolution remains incomplete and threatens to stagnate if the situation continues In *The Broadband Problem* economist and technology entrepreneur Charles H Ferguson explains the causes and ramifications of this damaging bottleneck and he offers suggestions on improving the current state of affairs He asserts that current telecommunications law and policy have not provided sufficient levels of new entry competition and innovation in the local telecom market The continuing dominance of ILECs incumbent local exchange carriers in that market impedes the healthy and much needed development of an efficient broadband market The result of these policy and market failures is inadequate technological progress innovation and productivity in advanced Internet services and telecommunication services generally The broadband problem is holding us back and thus must be addressed and solved With this important volume Charles Ferguson has contributed mightily to that mission *Your Call Is (Not That) Important to Us* Emily

Yellin, 2010-08-17 Bring up the subject of customer service phone calls and the blood pressure of everyone within earshot rises exponentially Otherwise calm rational and intelligent people go into extended rants about an industry that seems to grow more inhuman and unhelpful with every phone call we make And Americans make more than 43 billion customer service calls each year Whether it s the interminable hold times the outsourced agents who can t speak English or the

multitude of buttons to press and automated voices to listen to before reaching someone with a measurable pulse who hasn't felt exasperated at the abuse, neglect, and wasted time we experience when all we want is help and maybe a little human kindness. *Your Call Is Not That Important to Us* is journalist Emily Yellin's engaging, funny, and far-reaching exploration of the multibillion-dollar customer service industry and its surprising inner workings. Yellin reveals the real human beings and often surreal corporate policies lurking behind its aggravating facade. After reading this first-ever investigation of the customer service world, you'll never view your call center encounters in quite the same way. Since customer service has a role in just about every industry on earth, Yellin travels the country and the world meeting a wide range of customer service reps, corporate decision makers, industry watchers, and Internet-based consumer activists. She spends time at outsourced call centers for Office Depot in Argentina and Microsoft in Egypt. She gets to know the Mormon wives who answer JetBlue's customer service calls from their homes in Salt Lake City and listens in on calls from around the globe at a FedEx customer service center in Memphis. She meets with the creators of the yearly Customer Rage Study, customer experience specialists at Credit Suisse in Zurich, the founder and CEO of FedEx, and the CEO of the rising Internet retailer Zappos.com. Yellin finds out which country complains about service the most. Sweden interviews an actress who provides the voice for automated answering systems at many big corporations and talks to the people who run a website, GetHuman.com, that posts codes for bypassing automated voices and getting to an actual human being at more than five hundred major companies. Yellin weaves her vast reporting into an entertaining narrative that sheds light on the complex forces that create our infuriating experiences. She chronicles how the Internet and global competition are forcing businesses to take their customers' needs more seriously and offers hope from people inside and outside the globalized corporate world fighting to make customer service better for us all. *Your Call Is Not That Important to Us* cuts through corporate jargon and consumer distress to provide an eye-opening and animated account of the way companies treat their customers, how customers treat the people who serve them, and how technology, globalization, class, race, gender, and culture influence these interactions. Frustrated customers, smart executives, and dedicated customer service reps alike will find this lively examination of the crossroads of world commerce, the point where businesses and their customers meet, illuminating and essential.
