Manufacturing GT CM have been widely researched areas in the past 15 years and much progress has been made in all
branches of GT CM Resulting from this research activity has been a proliferation of techniques for part machine grouping
engineering data bases expert system based design methods for identifying part families new analytical and simulation tools
for evaluating performance of cells new types of cell incorporating robotics and flexible automation team based approaches
for organizing the work force and much more however the field lacks a careful compilation of this research and its outcomes
The editors of this book have commissioned leading researchers and implementers to prepare specific treatments of topics
for their special areas of expertise in this broad based philosophy of manufacturing The editors have sought to be global both
in coverage of topic matters and contributors Group Technology and Cellular Manufacturing addresses the needs and
interests of three groups of individuals in the manufacturing field academic researchers industry practitioners and students 1
The book provides an up to date perspective incorporating the advances made in GT CM during the past 15 years As a
natural extension to this research it synthesizes the latest industry practices and outcomes to guide research to greater real
world relevance 2 The book makes clear the foundations of GT CM from the core elements of new developments which are
aimed at reducing developmental and manufacturing lead times costs and at improving business quality and performance 3
Finally the book can be used as a textbook for graduate students in engineering and management for studying the field of
