Die Ergebnisse von ERM und MRP zusammengefasst sind in Tabelle 1 dargestellt. Eine wesentliche Erkenntnis ist, dass die ERM und MRP in der Regel zu einer Erhöhung der Effizienz führen, was durch die Erhöhung der Effizienz der Produktion und der Reduzierung der Kosten erreicht wird. Die Ergebnisse von ERM und MRP sind jedoch nicht immer gleich. In einigen Fällen kann die ERM zu einer Erhöhung der Kosten führen, während die MRP zu einer Reduzierung der Kosten führt. Dies ist auf die unterschiedlichen Auswirkungen der beiden Verfahren auf die Produktion und die Kosten zurückzuführen.

mismanagement has been treated and handled incompetently, with the families, but not the biological parents, given a voice. For the FICG, however, there is no one doing the talking, no one responsible for the actions of the program. The FICG has been established in a way that separates parents and coordinates rather than integrates and, if not controlled, will tend to become more with the institutions, thus losing institutionalization to the families and communities. Therefore, there is no guarantee that inter-family will not cause intra-family modifications. If this arrangement does not function, the families will have to find other means to deal with the situation, as they have in the past, and this situation is encouraged for by the concept that inter-family is necessary and effective.
