Connections for High Voltage On-Board Vehicle Electrical Wiring Harnesses - Test Methods and General Performance Requirements Connector Systems Standards Committee,2010 Procedures included within this specification are intended to cover performance testing at all phases of development production and field analysis of electrical terminals connectors and components that constitute the electrical connection systems in high power road vehicle applications that operates at either 20 V to 600 volts regardless of the current applied or any current greater than or equal to 80 A regardless of the voltage applied These procedures are applicable only to terminals used for In Line Header and Device Connectors and for cable sizes up to 120 mm² 4 0 In cases where power levels are mixed in the same connector i e sensing or normal 14 5 volt system circuits with High Power Contacts the High Power Contacts must pass J1742 requirements and all other contacts must pass SAE J2223 2 requirements The connection system housing and high power contacts shall meet J1742 requirements The requirements and procedures in this document are not intended for connections internal to electrical electronic modules or complete subassemblies This document does not contain a test for EMI EMC since these parameters must be tested as a combination of cable and connector These are considered system level requirements Determination of the need and type of test must be considered at that level See Appendix C Design Notes for further information

IMPORTANT NOTICE In any intended vehicle application if the products covered by this specification are or may be subjected to conditions beyond those described in this document they must pass special tests simulating the actual conditions to be encountered before they can be considered acceptable for actual vehicle application By way only of example this includes products that may be subjected to temperatures beyond the extremes of Class 5 in Table 2 of SAE J2223 2 or may be subjected to shock or vibration in the un sprung portions of a vehicle such as the wheel hub Products certified by

their supplier as having passed specific applicable portions of this specification are not to be used in applications where conditions may exceed those for which the product has been satisfactorily tested The Authorized Person is the final authority as to what tests are to be performed on his or her parts and for what purpose these tests are required He or she is also the final authority for resolving any questions related to testing to this specification and for authorizing any deviations to the equipment procedures and or acceptance requirements contained in this specification Any such deviation must be documented and included in the final test report and on the part print The following are examples of appropriate print notations Example 1 Test value per SAE J2223 2 Revision 1 paragraph 5 4 2 Connector Mating Un mating Force mating force value 85 N Example 2 SAE J2223 2 Revision 1 paragraph 5 4 9 Cavity Damage Susceptibility not applicable to this design Agreement to waive or alter test procedures and Acceptance Criteria must be made between customer and supplier Guidance as to the recommended tests for selected purposes is given in the charts in Appendix A and B In the absence of contrary direction from the Authorized Person in the test request order all electrical connectors and their associated terminals and other components are required to meet all applicable portions of this document with the following exception Specific tests that are not required or additional test requirements as specified in any document in the hierarchy of Section 2 The changes are intended to correct errors in the test sequence the table numbering and notes to the test sequence table NOTE No electrical connector terminal or related component may be represented as having met SAE specifications unless conformance to all applicable requirements of this specification have been verified and documented All required verification and documentation must be done by the supplier of the part or parts If testing is performed by another source it does not relieve the primary supplier of responsibility for documentation of all test results and for verification that all samples tested met all applicable Acceptance Criteria See Section 4
