world if we don t summon the courage to reconcile our political differences Two decades into the 21st Century the U S is less united than at any time in our history since the Civil War We are more diverse in our beliefs and culture than ever before But red and blue states secular and religious groups liberal and conservative idealists and Republican and Democratic representatives all have one thing in common each believes their distinct cultures and liberties are being threatened by an escalating violent opposition This polarized tribalism espoused by the loudest angriest fringe extremists on both the left and the right dismisses dialogue as appeasement if left unchecked it could very well lead to secession An engaging mix of cutting edge research and fair minded analysis Divided We Fall is an unblinking look at the true dimensions and dangers of this widening ideological gap and what could happen if we don t take steps toward bridging it French reveals chilling plausible scenarios of how the United States could fracture into regions that will not only weaken the country but destabilize the world But our future is not written in stone By implementing James Madison s vision of pluralism that all people have the right to form communities representing their personal values we can prevent oppressive factions from seizing absolute power and instead maintain everyone s beliefs and identities across all fifty states Reestablishing national unity will require the bravery to commit ourselves to embracing qualities of kindness decency and grace towards those we disagree with ideologically French calls on all of us to demonstrate true tolerance so we can heal the American divide If we want to remain united we must learn to stand together again The Blueprint: Success Is a State of Mind L Fuchs,2013-03-14 Imagine a world where

Emerging from the Rubble: Asian/American Writings on Disasters Yasuko Kase,Eliko Kosaka,2025-08-12 With a focus on the transpacific and transnational relationship between North America and Asia Emerging from the Rubble Asian American Writings on Disasters explores Asian Americans complex and nuanced involvement in disastrous events Included in this purview of disaster are not only the damages and threats of current ongoing climate change but also the long lasting ruining effects inflicted by imperialism neo colonialism wars and these historical components entanglement with global capitalism that have generated both spontaneous and slow and or prolonged violent effects Moreover disasters can be acknowledged as manifestations of the Anthropocene an epoch shaped by human activity or what scholars like Jason W Moore and Donna J Harraway term the Capitalocene a paradigm where nature and capitalist society are deeply intertwined co creating an intricate web of life Asian American involvement in such a web has never been simple but convoluted some of them have experienced tremendous losses whereas others have perpetuated obfuscation of the truth and or induced violence often contingently with or without acknowledging the facts When considering Asian migrants including refugees from Southeast Asia who had little option but to seek asylum in the U S and Asian Americans who have pursued their happiness under the U S s capitalist premise of constant progress protection of human rights and freedom of choice it is important to note that Asian migrants and Asian Americans have become simultaneously active players and exploited individuals within the context of U S racial capitalism Acknowledging the impossibility of clearly differentiating natural and human made disasters scholars who contribute to this volume note the reciprocal influences between nature and civilization They examine how the entanglements of natural and human made disasters lead to the acceleration and expansion of damage This volume explores how Asian Americans connections with their ancestral origins along with their particular racial positions social classes and socio historical backgrounds in North American societies force them to experience and witness disastrous events differently from the mainstream discourse on eco crises
