

PADDOCK'S TOXICOLOGY REPORT

Samples of Stephen Paddock's blood, urine and hair were used to perform the toxicology tests. At least 14 different substances were identified in the samples.

Laura M. Labay, forensic toxicologist:

"My opinions about the possibility regarding the manifestation of violent and aggressive behavior are detailed as follows:"

SUBSTANCES

SUMMARY OF FINDINGS

Benzodiazepines

FOUND:

Nordiazepam	42 ng/ml
Oxazepam	170 ng/ml
Temazepam	140 ng/ml

"Benzodiazepines are prescribed to treat a wide range of conditions including, but not limited to, anxiety, insomnia, and agitation. The finding of these substances in urine and not in blood show that Mr. Paddock had previously used or was exposed to this drug class."

Arsenic, antimony, selenium

FOUND:

Arsenic	12 mcg/L
Antimony	9.6 mcg/L
Selenium	12 mcg/L

"Even at elevated concentrations are not known to be associated with the production of violent and aggressive behavior."

Lead

FOUND:

Lead	73 mcg/dL
------	-----------

"However, for lead at the reported concentration of 73 mcg/mL in adults there is insufficient evidence that this concentration will cause violent and aggressive behavior."

The results listed are from blood samples.

Toxicology Report From Autopsy:

Guidelines for Reports by Autopsy Pathologists Vernard Irvine Adams, 2008-12-24 Guidelines for Reports by Autopsy Pathologists is intended to help the autopsy pathologist produce reports that communicate well Having evolved from a collection of faculty critiques of the autopsy reports summary and opinion reports scene reports and death certificates produced by residents in anatomic pathology and flows in forensic pathology the book emphasizes topics that have been troublesome for trainees For clinicians the medical record describes their work product For autopsy pathologists the written report is the work product and demands an accordingly higher standard of composition Most reports produced by pathologists can be divided into objective and subjective elements or in other words findings and opinions The pathologist must have a clear understanding of the linkage between the two When composing a report the autopsy pathologist should serve the goal of communicating to the parties who will read the report namely the case pathologist him or herself at a later date attorneys the family of the decedent and other physicians I believe that careless and imprecise thinking leads to sloppy language and that sloppy language leads to careless and imprecise thinking In my experience pathologists who learn how to clearly express and organize their findings and opinions in a written format make more detailed and focused observations at the autopsy table

Forensic Toxicology Robert H. Powers, Dorothy E. Dean, 2015-12-01 Designed for graduate and advanced undergraduate courses this book goes beyond the simple analysis of naming a drug or toxin taking a mechanistic approach to their effects on the body It provides an understanding of the mechanisms of action of drugs and toxins as well as their physiologic and pathologic consequences on the affected organ system Case histories photographs of gross pathology and photomicrographs further illustrate the processes and effects of toxic substances on the body **Autopsy Manual**, 1981

Postmortem Toxicology of Abused Drugs MD, FFFLM, Steven B. Karch, 2007-10-09 Postmortem Toxicology of Abused Drugs considers the role of toxicology in death investigation and gives practical insights on conducting toxicology tests and completing the toxicology report It explains chain of custody specimen collection and security sampling of blood urine bile and vitreous humor and selection of post mortem specimens The book analyzes various testing procedures discusses methods and strategies for analysis covers quality assurance protocols and controls and instructs in the proper interpretation of postmortem drug tests Heavily referenced and containing several tables figures and useful appendices this book is a handy reference for forensic scientists and medical examiners involved with death investigations The Education of a Coroner John Bateson, 2017-08-15 In the vein of Dr Judy Melinek's Working Stiff an account of the hair raising and heartbreaking cases handled by the coroner of Marin County California throughout his four decades on the job from high profile deaths to serial killers to Golden Gate Bridge suicides Marin County California is a study in contradictions Its natural beauty attracts thousands of visitors every year yet the county also is home to San Quentin Prison one of the oldest and largest penitentiaries in the country Marin ranks in the top one percent of counties nationwide in terms of affluence and overall health yet it is far

above the norm in drug overdoses and alcoholism and comprises a large percentage of suicides from the Golden Gate Bridge. Ken Holmes worked in the Marin County Coroner's Office for thirty six years starting as a death investigator and ending as the three term elected coroner. As he grew into the job which is different from what is depicted on television, Holmes learned a variety of skills from finding hidden clues at death scenes, interviewing witnesses, effectively managing bystanders and reporters, preparing testimony for court, to notifying families of a death with sensitivity and compassion. He also learned about different kinds of firearms, all types of drugs, prescription and illegal, and about certain unexpected and potentially fatal phenomena such as autoeroticism. Complete with poignant anecdotes, *The Education of a Coroner* provides a firsthand and fascinating glimpse into the daily life of a public servant whose work is dark and mysterious yet necessary for society to function.

Principles and Practice of Forensic Psychiatry Richard Rosner, Charles Scott, 2017-02-03. The third edition of this award winning textbook has been revised and thoroughly updated. Building on the success of the previous editions, it continues to address the history and practice of forensic psychiatry, legal regulation of the practice of psychiatry, forensic evaluation and treatment, psychiatry in relation to civil law, criminal law and family law, as well as correctional forensic psychiatry. New chapters address changes in the assessment and treatment of aggression and violence, as well as psychological and neuroimaging assessments.
