Sidaross, 2013-02 Honestly the American culture education and system need to be reformed for the best interest of the American public nations and the new generation after the End of the World on December 21 2012 Most of the American public cannot understand different styles of life because they never lived or experienced other languages or cultures Some Americans who have lived and worked abroad expressed satisfaction over living in America We could not understand the unexpressed secret but after Engineer Sidaross experienced the life education teaching engineering practice and the downbeat damaging effect of the legal system involvement in American society and culture she noticed misuse of freedom inequality prejudices and researched the cause of excessive lawsuits that Americans have experienced for decades Fortunately her background education professional career and engineering accomplishments prior to going to America was strong enough that she was able to help college and university students in America and reinstate deficient students in their college programs after they understood the concepts of math algebra and calculus that are topics fully learned in high school in Europe and Egypt As a government employed engineer in America she saved the State of California millions of dollars by correcting the mathematical errors of other engineers in engineering design before going to construction Unfortunately women engineers are swindled disparaged ridiculed used as sex objects and their engineering efforts are plagiarized with no justice in the legal system The Board of Engineers itself forged Engineer Sidaross s record without her consent for years until she discovered it after ten years but the court did nothing about it The Department of Education attempted to coerce Ms Sidaross to pay a bribing of 10 000 in addition to another 9 700 money laundering fraudulent amount inserted in her credit bureau records to

deny the approval of her student loan for 2012 2013 But we are thankful to ABI IBC and UCC ambassadors California governor Jerry Brown s office and Walden University for their strong support to obtain justice and get her student loan back However this massive fraud has caused six months delay of her graduation and massive unnecessary expenses and waste of tuition during the first shock when she discovered the fraud and tried to debate it for a few months We have personally lived and witnessed this dilemma with her and we wonder why America treats its citizens especially an accomplished woman engineer with highest level of education internationally and tried to mangle with her excellent records as explained further in the book **California. Supreme Court. Records and Briefs** California (State)., Court of Appeal Case s H011493 Number of Exhibits 3 Autos and Progress Joel Wolfe,2010-02-16 Autos and Progress reinterprets twentieth century Brazilian history through automobiles using them as a window for understanding the nation s struggle for modernity in the face of its massive geographical size weak central government and dependence on agricultural exports Among the topics Wolfe touches upon are the first sports cars and elite consumerism intellectuals embrace of cars as the key for transformation and unification of Brazil Henry Ford s building of a company town in the Brazilian jungle the creation of a transportation infrastructure democratization and consumer culture auto workers and their creation of a national political party and the economic and environmental impact of autos on Brazil This focus on Brazilians fascination with automobiles and their reliance on auto production and consumption as keys to their economic and social transformation explains how Brazil which enshrined its belief in science and technology in its national slogan of Order and Progress has differentiated itself from other Latin American nations Autos and Progress engages key issues in Brazil around the meaning and role of race in society and also addresses several classic debates in Brazilian studies about the nature of Brazil s great size and diversity and how they shaped state making The Management of Projects Peter W. G. Morris,1994 This book will undoubtedly become one of the classics of the project management literature There will be a growing need for project managers who can look beyond the internal processes of their projects to the organisational technological and socio economic contexts in which projects must be managed A good starting point would be for all project managers to read this book Construction Management and Economics
