Religious Education in Malawi and Ghana Yonah Matemba, Richardson Addai-Mununkum, 2021-03-15 Religious Education in Malawi and Ghana contributes to the literature on opportunities and complexities of inclusive approaches to Religious Education RE It analyses how RE in Malawi and Ghana engages with religious pluralisation and provides a compelling case for the need to re evaluate current approaches in the conceptualisation curriculum design and delivery of RE in schools in Malawi and Ghana The book explains how a pervasive tradition of selection involving exclusion and inclusion of religion in RE leads to misrepresentation and in turn to misclusion of non normative religions where religion is included but marginalized and misrepresented The book contributes to wider discourse of RE on opportunities as well as complexities of post confessional approaches including the need for RE to avoid perpetuating the continued legitimisation of selected religions and in the process the delegitimization of the religious other as a consequence of misrepresentation and misclusion Inspired by Braten's methodology for comparative studies in RE the book draws on two qualitative studies from Malawi and Ghana to highlight the pervasive problems of religious misclusion in RE This book will be of great interest for academics scholars and post graduate students in the fields of RE African education educational policy international education and comparative education [State of M&E in Malawi](#), 2014 [International Handbook of Mathematical Learning Difficulties](#) Annemarie Fritz, Vitor Geraldi Haase, Pekka Räsänen, 2019-01-30 This comprehensive volume provides teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there's still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings Now it's time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into

public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society **Annual Report for the Year ...** Malawi.
