aims to change the way we think about politics talk about politics and vote It does this in two ways First it shows it s impossible for a Republican Democrat or voter in any political party to possess a significant level of knowledge of facts that would help their party secure or maintain political power It calls this knowledge political knowledge and shows how unfeasible it is for anyone to have it Second it explains how we might best be politically engaged given that we have virtually no political knowledge To argue that it is impossible for any person to possess a significant amount of political knowledge the book depends on two empirically verified facts The first is that we have virtually no means of acquiring political information except by believing what other people say The second is that when people start talking about politics they become highly unreliable They re very likely to say false things when voicing political opinions because they employ a belief forming process that psychologists call identity protective cognition This is a type of reasoning aimed not at truth but at preserving one s membership in some identity defining group In combination these two observations cast serious doubt on all of our political beliefs As the book explains however the proper response to this doubt is not to simply avoid politics Rather the best response is a kind of humble but real engagement with politics that constantly manifests one s awareness that one is at best making educated guesses rather than speaking and acting from knowledge
