Towards Sustainable Food Production in Africa Morris Fanadzo, Nothando Dunjana, Hupenyu Allan Mupambwa, Ernest Dube, 2023-07-10 This edited book is focused on Sustainable Development Goal 2 It offers a comprehensive and topical collection of practices technologies and innovations in the field of sustainable food production and security under a changing climate It is a one stop handbook for farmers researchers extensionists policy makers and other stakeholders seeking to identify and disseminate best fit technologies for local and regional landscapes It offers an understanding of the challenges risks and uncertainties as well as opportunities to foster productive and sustainable food production Smallholder farming and agriculture in general is facing a serious threat from climate change that has resulted in erratic and unpredictable rainfall and increased temperatures among other abiotic stresses These climate change induced pressures have reduced productivity mainly among the smallholder farmers who are critical in driving the attainment of sustainable development goals like SDG 2 12 and 13 The objective of the book is to document effective and practicable practices and technologies that can be adopted by smallholder African farmers as mitigation measures against the effects of climate change This book is of interest to researchers agricultural scientists climate change scientists capacity builders and policymakers **Grassroots Leadership**

and the Arts For Social Change Susan J. Erenrich, Jon F. Wergin, 2017-03-29 This book explores the intersection of grassroots leadership and the arts for social change examining the many movements and subsequent victories the arts community has won for society The book illustrates the diverse but influential work of these figures reflecting on their actions commitments and their positive impact on the modern world **Deanship in the Global South** Oliver J.J.

Seale, 2021-02-08 The university today is a postmodern neo liberal competitive boundary less knowledge conglomerate a far cry from its historical traditional classical and collegial roots There is a body of literature on deanship that points to its evolving nature in the contemporary academe characterised by complexity and change Balancing academic demands simultaneously with the requirements for effective performance leadership and management lies at the heart of this very challenging bridging role nowadays Deans are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown domain of executive management with its related problems Deans nowadays are required to be more than collegial intellectual leaders They are also meant to be fiscal and human resource experts fundraisers politicians and diplomats Deanship in the Global South Bridging Troubled Waters is about the deans lived reality as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account Their lack of preparation and inadequate support points to the need for a more strategic integrated approach to leadership development within their critical bridging roles between the academe and administration

Management Studies in South Africa Shaun Ruggunan, R. Sooryamoorthy, 2018-09-20 This book examines the trajectory of management studies in South Africa during the apartheid and post apartheid periods The unique political

journey of South Africa provides a distinctive context in which to explore the progression of management studies within a developing state. The authors consider how Apartheid has configured the discipline of management studies to reflect certain racial institutional and gendered trends and analyse the extent to which these trends have adapted or changed in post Apartheid times. Appealing to management scholars and professionals, this book provides implications for policy and practice within the South African higher education sector and presents avenues for future research.

Clown of the City Stephan de Beer, 2020-11-25. At opening this book, everything one has learned or thought about urban ministry is challenged and changed. Stephan de Beer offers a fresh, exciting and thoroughly engaging approach. The title is enticing and playful, but the book is a serious grappling with the daunting realities of a shadowed, marginalised urban life. It does not theorise or pontificate about a concept. The author is not a distant, neutral observer. He is an engaged minister to the people, a struggler in their struggles, a prophet to the powerful. This book invites the reader to join the people of the cities under siege by failed policies, empty promises and disastrous politics in their struggles for meaningful life, and it makes a powerful, persuasive case. Stephan de Beer has offered us a great gift and a wonderful opportunity to think and hope anew and differently about the life, reality and future of the city.

Monument Culture Laura A. Macaluso, 2019-05-30. *Monument Culture: International Perspectives on the Future of Monuments in a Changing World* brings together a collection of essays from scholars and cultural critics working on the meanings of monuments and memorials in the second decade of the twenty-first century, a time of great social and political change. The book presents a broad view of the challenges facing individuals and society in making sense of public monuments with contested meanings. From the United States to Europe to Africa to Australia and New Zealand to South America and beyond, the contributors tackle the ways in which different places approach monuments in a landscape where institutions and ideas are under direct challenge from political and social unrest. It also discusses sharply changed attitudes about the representation of history and memory in the public sphere. The goal is to acknowledge shared experiences through a wider perspective to contribute to the work of the world-wide heritage community and to document the history and shifting cultural attitudes towards monument culture across the world, encouraging a more informed approach to monuments and their meanings, especially for the public and those outside of academia.

Electrodeposition of Composite Materials A.M.A. Mohamed, Teresa Golden, 2016-03-23. Nanocomposite coatings have various properties that can be utilized for corrosion protection and tribological improvements. Synthesis of the nanocomposite coatings using an electrodeposition method allows unique control of the experimental parameters. By fine-tuning the experimental parameters, various compositions and properties can be obtained for the nanocomposite coatings. This book covers some of the electrochemical methods used for nanocomposite coating deposition as well as discusses in detail examples of several nanocomposite coatings. The corrosion and tribological performance of the nanocomposite coatings are also covered, and some nanocomposite coatings are discussed for specific technological areas such as fuel cells and
