BLACK STUDENTS FIGHT FOR
EQUITY FROM SEGREGATION
TO PRESENT-DAY

Tulane admitted its first Black students in the fall of 1963. In 2019 Tulane enrolled a record-high 92 Black students. A look back at the history of the Black student experience at Tulane allows for reflection on the progress the institution has made and highlights a need for continued work.

Like most private institutions, especially in the South, Tulane did not admit Black students at the time of desegregation. Paul Tulane wrote in his 1882 letter of donation that the university should be used for "the promotion and encouragement of ... education among the white young persons in the city of New Orleans."

These words that became a part of the Tulane charter played a role in the Tulane Board's attitudes toward integration. In their book "Tulane: The Emergence of a Modern University," Clarence Mohr and Joseph Gordon write that "No members of the Board expressed enthusiasm over the prospect of admitting black students, and it seems likely that most who supported the idea did so reluctantly."

"I know that [integration] was contentious and that the institution fought long and hard to try to avoid [it] for as long as they could until they were absolutely forced to integrate," Tulane history professor Randy Sparks, who specializes in the Old and New South, said. "So I think it was a difficult task at Tulane as it was at many southern institutions and most other southern institutions."

This did not stop Tulane from admitting students from other underrepresented backgrounds who weren't Black, such as women and international exchange students. Keira Williams, a lecturer in the school of history, anthropology, philosophy and politics at Queen's University Belfast wrote about these practices.

Twenge,2017-08-22 We've all been desperate to learn what heavy use of social media does to adolescents Now thanks to Twenge's careful analysis we know It is making them lonely anxious and fragile especially our girls If you are a parent teacher or employer you must read this fascinating book Jonathan Haidt author of *The Anxious Generation* Born after 1995 they grew up with cell phones had an Instagram page before high school and cannot remember a time before the Internet They are iGen Now here is crucial reading to understand how these children teens and young adults are vastly different from their millennial predecessors and from any other generation With generational divides wider than ever parents educators and employers have an urgent need to understand today's rising generation of teens and young adults Born in the mid 1990s up to the mid 2000s iGen is the first generation to spend their entire adolescence in the age of the smartphone With social media and texting replacing other activities iGen spends less time with their friends in person perhaps contributing to their unprecedented levels of anxiety depression and loneliness But technology is not the only thing that makes iGen distinct from every generation before them they are also different in how they spend their time how they behave and in their attitudes toward religion sexuality and politics They socialize in completely new ways reject once sacred social taboos and want different things from their lives and careers More than previous generations they are obsessed with safety focused on tolerance and have no patience for inequality As this new group of young people grows into adulthood we all need to understand them friends and family need to look out for them businesses must figure out how to recruit them and sell to them colleges and universities must know how to educate and guide them And members of iGen also need to understand

Sitting In and Speaking Out Jeffrey A. Turner,2010-10 In *Sitting In and Speaking Out* Jeffrey A Turner examines student movements in the South to grasp the nature of activism in the region during the turbulent 1960s Turner argues that the story of student activism is too often focused on national groups like Students for a Democratic Society and events at schools like Columbia University and the University of California at Berkeley Examining the activism of black and white students he shows that the South responded to national developments but that the response had its own trajectory one that was rooted in race Turner looks at such events as the initial desegregation of campuses integration s long aftermath as students learned to share institutions the Black Power movement and the antiwar movement Escalating protest against the Vietnam War tested southern distinctiveness says Turner The South s tendency toward hawkishness impeded antiwar activism but once that activism arrived it was as in other parts of the country oriented toward events at national and global scales Nevertheless southern student activism retained some of its core characteristics Even in the late 1960s southern protesters demands tended toward reform often eschewing calls to revolution increasingly heard elsewhere Based on primary research at more than twenty public and private institutions in the deep and upper South including historically black schools *Sitting In and Speaking Out* is a wide ranging and sensitive portrait of southern students navigating a remarkably dynamic era **Book News** ,1893 **Title News** ,1968 Includes proceedings of the association s annual convention
