

KEY FEATURES

Large, bright, high-resolution color screen
makes instrument control easy

Optimized for Trimble Access field software

Fully integrated camera, GPS navigation,
and communications

Improved collaboration and control
through wireless connectivity

The Trimble TSC3 controller with Trimble Access™ software is a groundbreaking handheld field computing solution that streamlines the flow of everything surveying work and the quality of the data you need for the field.

A POWERFUL ENGINE FOR POWERFUL RESULTS

The TSC3 is a trusted line of field controllers. The Trimble TSC3 controller is rugged and designed for superior performance. It performs Trimble Access operations fast and efficient, single power for most field-point applications on the Windows® platform.

IMAGES, IMAGES AND EXCELLENCE IN THE FIELD

With an onboard 5MP autofocus camera and LED flash, you can take digital photographs of your job site right from the controller. Measuring details, features, or the quantity are required, and images are automatically geotagged for easy identification.

Quickly record the qualitative information that currently takes hours to enter into the controller or work program. The benefits of including images as part of your workflow are almost countless: from easy data transfer to the field quality assurance.

COMMUNICATIONS THAT BRIDGE THE SUBURBS TO THE FIELD

The TSC3 controller enables numerous instant connectivity through an integrated cellular/GPRS modem. This allows Trimble Access software to facilitate a constant flow of information between field and office, including real-time synchronization of field and office datasets, project management software, the use of cloud-based and other important files and more. With field surveys, in the field, data collection, processing, analysis, and delivery are faster and more efficient.

A wealth of communication options let you transfer critical information and makes the communication constant with GPRS connections using the internal modem, secure peer-to-peer networks through Bluetooth or USB and serial RS-485 communication options.

REALLY AN IDEAL CONNECTING SOLUTION

The rugged TSC3 controller is purpose-built to make field integration, mapping, and spatial imaging processes more efficient, and more flexible.

- 1. **Easy to use interface**—streamlined survey and works your way on the large, bright, high-resolution touchscreen. Make the option of a graphical or conventional paper-screen keyboard, this entry is quick and easy.
- 2. **On-board Camera**—facilitates direction, navigation, and any other mapping or surveying functions.
- 3. **Integrated GPS**—Trimble GPS branch out a conventional survey without an external GPS receiver. Facilitates mapping and field control points and other survey quality.
- 4. **Cables Bluetooth**—Trimble's wireless technology dominates modern surveying systems. The internal 2.4 GHz radio system is also ideal for controlling Trimble systems.

A fully integrated controller with a bright, daylight-readable display will make your field work more efficient.

Kando, 2020-09-01 This open access book summarizes the first two decades of the NII Testbeds and Community for Information access Research NTCIR NTCIR is a series of evaluation forums run by a global team of researchers and hosted by the National Institute of Informatics NII Japan The book is unique in that it discusses not just what was done at NTCIR but also how it was done and the impact it has achieved For example in some chapters the reader sees the early seeds of what eventually grew to be the search engines that provide access to content on the World Wide Web today s smartphones that

can tailor what they show to the needs of their owners and the smart speakers that enrich our lives at home and on the move We also get glimpses into how new search engines can be built for mathematical formulae or for the digital record of a lived human life Key to the success of the NTCIR endeavor was early recognition that information access research is an empirical discipline and that evaluation therefore lay at the core of the enterprise Evaluation is thus at the heart of each chapter in this book They show for example how the recognition that some documents are more important than others has shaped thinking about evaluation design The thirty three contributors to this volume speak for the many hundreds of researchers from dozens of countries around the world who together shaped NTCIR as organizers and participants This book is suitable for researchers practitioners and students anyone who wants to learn about past and present evaluation efforts in information retrieval information access and natural language processing as well as those who want to participate in an evaluation task or even to design and organize one
