Amanda Jefferies and Marija Cubric ,2015-10-13 These Proceedings represent the work of contributors to the 14th European Conference on e Learning ECEL 2015 hosted this year by the University of Hertfordshire Hatfield UK on 29 30 October 2015 The Conference and Programme Co Chairs

are Professor Amanda Jefferies and Dr Marija Cubric both from the University of Hertfordshire. The conference will be opened with a keynote address by Professor Patrick McAndrew, Director, Institute of Educational Technology, Open University, UK, with a talk on 'Innovating for learning: designing for the future of education'. On the second day, the keynote will be delivered by Professor John Traxler, University of Wolverhampton, UK, on the subject of 'Mobile Learning: No Longer Just e-Learning with Mobiles'. ECEL provides a valuable platform for individuals to present their research findings, display their work in progress, and discuss conceptual advances in many different branches of e-Learning. At the same time, it provides an important opportunity for members of the EL community to come together with peers, share knowledge, and exchange ideas. With an initial submission of 169 abstracts, after the double-blind peer review process, there are 86 academic papers, 16 PhD Papers, 5 Work in Progress papers, and 1 non-academic paper in these Conference Proceedings. These papers reflect the truly global nature of research in the area, with contributions from Algeria, Australia, Austria, Belgium, Botswana, Canada, Chile, Coventry, Czech Republic, Denmark, Egypt, England, Estonia, France, Germany, Ireland, Japan, Kazakhstan, New Zealand, Nigeria, Norway, Oman, Portugal, Republic of Kazakhstan, Romania, Saudi Arabia, Scotland, Singapore, South Africa, Sweden, the Czech Republic, Turkey, Uganda, UK, United Arab Emirates, UK, and USA, Zimbabwe. A selection of papers, those agreed by a panel of reviewers and the editor, will be published in a special conference edition of the EJEL, Electronic Journal of e-Learning, www.ejel.org.

The Guide to COIL Virtual Exchange Jon Rubin, Sarah Guth, 2023-07-03. This is the authoritative guide to implementing COIL Virtual Exchange, conceived and co-edited by one of the originators of this innovative approach to internationalization. Jon Rubin, COIL, the acronym for Collaborative Online International Learning, is a central modality of what has come to be known as virtual exchange. Since its first iteration in 2002, it has gradually established itself as a mature pedagogy that is being increasingly implemented across the world and is validated by a growing body of research. COIL Virtual Exchange, at its most essential, is a bi-lateral online exchange involving the integration of existing courses across two or sometimes more institutions that are geographically and/or culturally distinct. To launch a COIL VE course, the instructor of a class at a higher education institution in one location links online with a professor and his or her class in another region or country. Together, their students engage and develop joint projects, usually over a continuous five to eight-week period. Compared to the limited number of students worldwide who can engage in study abroad, COIL VE potentially opens up more equitable and inclusive participation in international education and intercultural experiences to all students. It involves them in rigorous disciplinary and interdisciplinary studies and promotes close and constructive engagement with students with different cultural perspectives. While many COIL courses are launched by individual instructors based on their research connections and online outreach, they are being increasingly supported and led by dedicated COIL Coordinators who facilitate virtual exchanges and provide professional development. This comprehensive guide covers COIL VE pedagogy, provides examples of what takes place in the COIL classroom, and explores what instructors and staff need to know to

facilitate and support a variety of COIL courses across the curriculum It addresses how institutional stakeholders especially those in leadership positions can develop and embed a successful COIL initiative at their institution It offers varied perspectives of COIL viewed from different institutional and cultural vantage points from research universities community and technical colleges and university systems and describes how COIL VE is developing in five different world regions presenting eleven case studies The book concludes with a guide to thirteen global organizations that support COIL and other forms of VE Additionally the book provides links to the COIL Connect for Virtual Exchange website <https://coilconnect.org> which includes an updated directory of organizations an expanding database of faculty and institutions participating in COIL and looking for partners course templates survey data and case studies This book offers faculty and administrators across the world whether formally involved in international education in service learning and community engagement or wanting to incorporate a cross cultural perspective in their disciplinary courses theoretical foundations guidance on effective collaboration and the strategic and pedagogical considerations to develop robust COIL VE courses and programs

Proceedings of the International Conference on Business and Management Dynamics 2016: Sustainable economies in the information economy Joy E. Akahome, Michael Twum-Darko, Cyril Ogbokor, Nyaniso Mfusi Zonke, T. Sethibe, R. Steyn, Esme Mohammed, Renier Steyn, L.B. Nguenang, Mamorena Lucia Matsoso, Henry N. Ozuru, Julius Akaba, Patient Rambe, Edem Korku Agbobli, Henri-Vincent Ndjave-Ndjoy, Regis Muchemwa, Andre de la Harpe, Konosoang Mpiti, Ayodeji Afolayan, 2016-12-31 Cape Town South Africa 7 Sept 2016 8 Sept 2016 Theme Sustainable economies in the information economy Purpose To share the quality academic papers presented at the International Conference on Business and Management Dynamics ICBMD held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town As grey literature the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates Methodology The methodology used varies from researcher to researcher but are suitable for the studies conducted Thus on the one hand studies that were subjective in nature used the interpretive paradigm where the qualitative approach adopted made use of the interview method to collect data On the other hand studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data However there were some academic papers which used mixed methodology because of the nature of the study Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology Contribution made to scholarship The articles come from individual researchers and each article in the proceedings is unique Mostly there is no general argument leading from one contribution to the next However it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth With regard to human capital development papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of

personal branding or on elements of the topic Thus the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors Furthermore it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation With regard to technology and big data impact on organisational performance it was evident that system performance memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance Most of the articles contribution reemphasised technology education and training as a means of digitising business and improving effectiveness Target audience The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics information management business education development studies social sciences and technology It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment
