Nanostructured Materials for Biomedical Applications Raji Vijayamma, Nandakumar Kalarikkal, Sabu Thomas, 2024-06-18 Nanostructured Materials for Biomedical Applications highlights progress challenges and opportunities in nanomedicine and discusses novel engineering approaches of nanostructured materials that are useful in various biomedical applications The book provides a comprehensive review of the state of the art in bio nanotechnology with an emphasis on diverse biomedical applications such as in drug delivery bioimaging hyperthermia and targeted cancer therapy Users will find this to be a broad introductory reference for anyone new to the field or those who wish to gain a thorough overview of nanostructured materials in the context of biomedical applications The breadth of this book will appeal to an interdisciplinary audience including materials scientists pharmaceutical scientists and biomedical engineers Covers a range of nanomaterial types including metal nanoparticles

luminescent nanoparticles cubosomes smart nanostructures and much more Reviews the diverse applications of nanomaterials in biomedicine such as in theranostics biosensing cancer therapy drug delivery and tissue engineering Provides a concise introductory reference for those new to the fields of bionanomaterials and bio nanotechnology

Pattern Recognition for Reliability Assessment of Water Distribution Networks N. Trifunovic, 2012-02-13 This study investigates the patterns that describe reliability of water distribution networks focusing to the node connectivity energy balance and economics of construction operation and maintenance A number of measures to evaluate the network resilience has been developed and assessed to arrive at more accurate diagnostics of regular and irregular demand scenarios These measures have been proposed as a part of the methodology for snap shot assessment of network reliability based on its configuration and hydraulic performance Practical outcome of the research is the decision support tool for reliability based design of water distribution networks This computer package named NEDRA Network Design and Reliability Assessment consists of the modules for network generation filtering initialisation optimisation diagnostics and cost calculation which can be used for sensitivity analyses of single network layout or assessments of multiple layouts The study concludes that none of the analysed aspects develops clear singular patterns Nevertheless the proposed network buffer index NBI and the hydraulic reliability diagram HRD as visual representation of the network resilience give sufficient snap shot pointing the composition of the index value and displaying possible weak points in the network that can be hidden behind the averaged values of various reliability measures
