

The background of the slide is a dark grey collage. At the top, there is a horizontal strip of various shades of grey and white, resembling a color calibration target. To the left, a vertical row of numerous colored pencils is shown, with their tips pointing towards the center. On the right side, there are several blue pencils standing upright. In the bottom left corner, there are five red pens or markers standing upright. A white, stylized line drawing of a hand holding a pen is visible in the bottom left area, partially overlapping the red pens.

The Value of Drawing Instruction in the Visual Arts and Across Curricula Seymour Simmons III, 2021-03-29 By applying philosophical and historical perspectives to drawing instruction this volume demonstrates how diverse teaching methods contribute to cognitive and holistic development applicable within and beyond the visual arts Offering a new perspective on the art and science of drawing this text reveals the often unrecognized benefits that drawing can have on the human mind and thus argues for the importance of drawing instruction despite and even due to contemporary digitalization Given the predominance of visual information and digital media visual thinking in and through drawing may be an essential skill for the future As such the book counters recent declines in drawing instruction to propose five Paradigms for teaching drawing as design as seeing as experience and experiment as expression and as a visual language with exemplary curricula for pre K12 art and general education pre professional programs across the visual arts and continuing education With the aid of instructional examples this volume dispels the misconception of drawing as a talent reserved for the artistically gifted and posits it as a teachable skill that can be learned by all This text will be of primary interest to researchers scholars and doctoral students with interests in drawing theory and practice cognition in the arts positive psychology creativity theory as well as the philosophy and history of arts education Aligning with contemporary trends such as Design Thinking STEAM and Graphicacy the text will also have appeal to visual arts educators at all levels and other educators involved in arts integration

Learning to Draw Ann Bermingham, 2000 As early as the sixteenth century drawing in England came to be seen as something more than an activity exclusive to artists it became a polite and useful art a practice of everyday life This generously illustrated book explores the social and cultural processes that enabled drawing to emerge as an amateur pastime as well as the meanings that drawing had for people who were not artists Ann Bermingham shows how the history of drawing in England from the age of Elizabeth I to the era of early photography mirrored changes in society politics the practical world and notions of self The book examines how drawing intersected with a wide range of social phenomena from political absolutism writing empirical science and Enlightenment pedagogy to nationalism industrialism tourism bourgeois gentility and religious instruction Bermingham discusses the central role of drawing and the visual arts in

Renaissance debates about government and self government then considers the relations between seventeenth century drawing natural science and the masculine ideal of the honest gentleman She also investigates landscape drawing in the context of eighteenth century views on sens

Developing Visual Arts Education in the United States Mary Ann Stankiewicz, 2016-06-15 This book examines how Massachusetts Normal Art School became the alma mater par excellence for generations of art educators designers and artists The founding myth of American art education is the story of Walter Smith the school s first principal This historical case study argues that Smith s students formed the professional network to disperse art education across the United States establishing college art departments and supervising school art for industrial cities As administrative progressives they created institutions and set norms for the growing field of art education Nineteenth century artists argued that anyone could learn to draw by the 1920s every child was an artist whose creativity waited to be awakened Arguments for systematic art instruction under careful direction gave way to charismatic artist teachers who sought to release artistic spirits The task for art education had been redefined in terms of living the good life within a consumer culture of work and leisure

New Images of Thought in the Study of Childhood Drawing Laura

Trafi-Prats, Christopher M. Schulte, 2022-10-21 This book provides a revitalised account of the study of children s drawing by outlining a departure from existing approaches privileging developmentalist accounts and presenting drawing as a specialised human endeavour separated from other material entanglements constituting children s everyday experiences The book takes on current developments in the fields of early childhood arts and early childhood literacies to advocate for process oriented new materialist and decolonial approaches that re conceptualise the study of children s drawing It proposes a future oriented approach centred on thinking experimentally with a focus on nonrepresentational elements such as movement sensation intensity rhythm story and place which singularly assemble in drawing events Thus the book discusses drawing as a process of sense making that is not enclosed in the individualised body of the child and that unfolds corporeally in time and space It revises the relation of drawing with symbolisation by suggesting that the use of language and signs in drawing form in entanglement with matter and sensation in processes of creative speculation connected with the movement of thought Presenting a series of contributions by internationally recognised scholars and artists the book aims to create synergies between theory and practice that speak of everyday realities interconnecting children learning and sense making

Drawing and Painting John Matthews, 2003-03-19 This book is a tremendous resource for any early years setting It enables us and encourages us to explore the process of artistic development through a fresh and inclusive lens Nursery World This book is a welcome update of an informative text describing the process of children s mark making as a visual physical and interactive process urging us to consider how we as adults perceive and support young children s mark making activities both at home and school John Matthews demonstrates the cognitive function of this early mark making in relation to general individual development Early Years A thought provoking and informative book this is essential reading for anyone

involved in the education of young children Times Educational Supplement Teacher Drawing and Painting is a fascinating and delightful read for tutors practitioners and students and is highly recommended an essential text for early years courses at level 3 and above Under Five This book has been revised to reflect recent developments in early childhood education in developmental psychology and in our understanding of children s development in the arts The author shows how this new model of children s development in visual representation has important implications for education The author examines children s development in visual expression and suggests how this development might be supported The book takes issue with the inherited wisdom about children s development in visual representation The traditional approach describes children s development in terms of supposed deficits in which children progress from primitive earlier stages to superior ones until the defects in their representational thinking are overcome and they arrive at an endpoint of visual realism This approach is the pervasive influence on curricular planning in arts education and in early years education The author explains recent different models of development in visual expression Instead of measuring children s efforts against an adult paradigm the new models identify the modes of representation used by children as consequences of children s own intentions motivations and priorities The writing is accessible and assumes no specialist knowledge of psychological theory art its history or interpretation This book is essential reading for early childhood educators at nursery and pre school level for other professionals who work with very young children and parents as well as students and tutors on early years courses This is a revised edition of *Helping Children to Draw and Paint Children and Visual Representation* originally published in 1994
