Paton, Paolo Missier, Cornelia Hedeler, 2009-07-21 Data integration in the life sciences continues to be important but challenging The ongoing development of new experimental methods gives rise to an increasingly wide range of data sets which in turn must be combined to allow more integrative views of biological systems Indeed the growing prominence of systems biology where mathematical models characterize behaviors observed in experiments of different types emphasizes the importance of data integration to the life sciences In this context the representation of models of biological behavior as data in turn gives rise to challenges relating to provenance data quality annotation etc all of which are associated with significant research activities within computer science The Data Integration in the Life Sciences DILS Workshop Series brings together data and knowledge management researchers from the computer science research community with bioinformaticians and computational biologists to improve the understanding of how emerging data integration techniques can address requirements identified in the life sciences **The Original Ending of Mark** Nicholas P. Lunn, 2014-10-01 Although traditionally accepted by the church down through the centuries the longer ending of Mark's Gospel 16:9-20 has been relegated by modern scholarship to the status of a later appendage The arguments for such a view are chiefly based upon the witness of the two earliest complete manuscripts of Mark and upon matters of language and style This work shows that these primary grounds of argumentation are inadequate It is demonstrated that the church fathers knew the Markan ending from the very earliest days well over two centuries before the earliest extant manuscripts The quantity of unique terms in the ending is also seen to fall within the parameters exhibited by undisputed Markan passages Strong indications of Markan authorship are found in the presence of specific linguistic constructions a range of literary devices and the continuation of various themes prominent within the body of the Gospel Furthermore the writings of Luke show that the Gospel of Mark known to this author contained the ending Rather than being a later addition the evidence is interpreted in terms of a textual

omission occurring at a later stage in transmission probably in Egypt during the second century
