George Minakakis, 2019-04-22 We've all heard of the Great Depression. Many of us went through the Great Recession. Now, whether we know it or not, all of us are taking part in the Great Transition: a state of unpredictability and change driven by technology and consumers. The speed of which in the coming decade will be unprecedented. It is already disrupting social, economic, and political order. Career and business lives in all industries are being equally challenged to change and adapt faster. The rules have changed and will continue to evolve, making it much more difficult to transition from the old economy to the new one. The leaders who are driving this change are unconventional, that's why they can disrupt entire industries, sometimes seemingly overnight. This book is a much-needed prescription on how to transition your leadership skills and business to become unconventionally competitive. Unconventional leadership today isn't about thinking out of the box; it is about how to compete outside the box. Here's the catch: there's only a small window of time to adapt and successfully transition into that unconventional arena where we compete for jobs and business growth. There are valuable lessons to be learned by understanding how some small companies have lasted hundreds of years and a small handful for over one thousand years through all kinds of disruptions: social, political, economic, technological, and environmental. You will learn how to build a different kind of company through the five disciplines of growth, the reliability quotient, and the COST principles, all of which will lead you to a higher level of competitive performance and resilience to threats. The Great Transition offers a groundbreaking view of leadership and how to participate in this new economy. Join business leader and author George Minakakis as he shares the leadership skills and competencies required to succeed in the new economy. *Knowledge*
