Longmore, 2012-12-06 D B LONGMORE The concept of the meeting on which this book is based is unique There has never before been a multi disciplinary meeting based entirely on the concept of making a major branch of surgery safer Hopefully this meeting will be archetypal and will set a precedent for similar attempts in other disciplines as well as future efforts to make cardiac surgery safer Cardiac surgery is still a rapidly growing discipline even after a quarter of a century of experience Like any new area of science or medicine initially there is an exponential growth of work publications meetings options of available equipment and all the ancillary and peripheral disciplines associated with it The ideas of the handful of original surgical pioneers some of whom have contributed to this book formed the basis of a still rapidly growing young branch of surgery with a whole new medical discipline of total extracorporeal circulation involving biochemical and haemodynamic control of a patient *Scattering of Thermal Neutrons* Andre Larose, 2012-12-06 Solid state physicists have long appreciated the usefulness of thermal neutron scattering in the investigation of condensed matter This technique was first made possible by the advent of the nuclear reactor and has since then undergone many refinements The developments in this field of research have we felt necessitated the making of a comprehensive compilation of the published thermal neutron papers The large number of titles collected in this book as well as their diversity and their yearly distribution reflects the continued contribution of the neutron probe to our understanding of physical systems This bibliography is an updated and improved version of the one first published by us in March of 1973 under a similar title Many of the omissions and inconsistencies of the first edition such as occurred for example in the initialing of authors names have been corrected The literature search has been carried back to 1932 the year when the existence of the neutron was experimentally confirmed Several additional journals have also been searched and brought up to date together with those listed in our first publication The number of entries is now 8543 an increase of 65 per cent relative to the first edition **Land Use, Land Cover and Soil Sciences - Volume VI** Willy H.
