

Overview – QCV Slide-In Series

vav retrofit terminals

FEATURES AND BENEFITS

Titus Slide-In Retrofit Terminals convert these old constant volume systems to modern and energy efficient variable air volume systems.

Slide-In retrofit terminals are designed to transform inefficient constant volume systems to present day variable volume systems with very low installation costs. The resulting performance of a system incorporating Titus QCV series terminals approaches that of a VAV system using ESV series single duct terminals.

With the simple installation method, conversion costs are minimized. The installer simply cuts a rectangular hole in the side of the duct, cuts away the insulation (if present), slides the unit into the duct, and connects the mounting plate to the side of the duct.

Take a look at many of the unique features of a Titus QCV series retrofit terminal.
