and policy curriculum at the War College The fourth edition is published in two volumes that correspond roughly to the

Department of National Security and Strategy s core courses Theory of War and Strategy and National Security Policy and

Strategy Like previous editions this one is largely an expansion of its predecessor rather than a major rewriting About a

quarter of the chapters are new and several others have undergone significant rewrites or updates However approximately

half of the book remains unchanged Although this is not primarily a textbook it does reflect both the method and manner we

use to teach strategy formulation to America s future senior leaders The book is not a comprehensive or exhaustive treatment

of either strategic theory or the policymaking process Both volumes are organized to proceed from the general to the specific

Thus the first volume opens with general thoughts on the nature and theory of war and strategy proceeds to look at the

complex aspect of power and concludes with specific theoretical issues Similarly the second volume begins by examining the

policy strategy process moves to a look at the strategic environment and concludes with some specific issues This edition
