graffiti and street art appear shed light on previously unexamined aspects of these practices and introduce innovative methodologies regarding the treatment of these images Throughout the focus is on the relationship of graffiti and street art with urban space and the various manifestations of these idiosyncratic meetings In this book the emphasis is shifted from what the physical texts say to what these practices and their produced images do in different contexts All chapters are original and come from experts in various fields such as Architecture Urban Studies Sociology Criminology Anthropology and Visual Cultures as well as scholars that transcend traditional disciplinary frameworks This exciting new collection is essential reading for advanced undergraduates as well as postgraduates and academics interested in the subject matter It is also accessible to a non academic audience such as art practitioners and policymakers alike or anyone keen on deepening their knowledge on how graffiti and street art affect the ways urban environments are experienced understood and envisioned
