Understanding Learning Difficulties in Maths: Dyscalculia, Dyslexia or Dyspraxia? Judy Hornigold,2017-10-16 Why do some pupils experience maths learning difficulties How can you determine whether there is a specific learning difficulty such as dyscalculia dyspraxia or dyslexia What teaching strategies can help overcome maths anxiety and specific maths learning difficulties Without doubt maths is one of the most important subjects taught in schools and yet it is the one subject that can strike fear and dread in children from the very start of their education In this book Judy Hornigold explores potential causes of maths learning difficulties and particularly the specific difficulties that learners with dyscalculia dyslexia and or dyspraxia experience It considers how general maths anxiety impedes mathematical development and then examines whether this or a more fundamental and specific difficulty with maths such as dyscalculia is the real root

of difficulties The book then looks in detail at a wide range of strategies to help overcome general maths anxiety and more specific learning difficulties It addresses four distinct areas core number reasoning memory and visual spatial awareness as the main areas of difficulty for learners with dyscalculia core number and reasoning dyslexia memory and dyspraxia visual spatial awareness Congressional Record United States. Teaching and Time Poverty Greg Thompson, Anna Hogan, 2024-12-04 As teacher shortages reach a global crisis point this book explores how time poverty has become a critical factor in the working lives of teachers and school leaders Arguing that we need to move away from framing the problem of teachers work as simply workload this book suggests that understanding time poverty is the first step in moving toward more manageable working lives The book brings together international perspectives on teacher time poverty drawing on theoretical and empirical work to underscore the growing complexity of teachers work and how this impacts job satisfaction stress and feeling that there is never enough time to accomplish all that needs to be done Many policy solutions misdiagnose the problems of teachers work simply suggesting it is an issue of workload The chapters investigate issues of work intensification finding that teachers are not only working longer but also working harder as they manage more complex classrooms and policy mandates This book is essential reading for those interested in understanding how current education policy both produces time poverty and could better identify and respond

to the complexities of teachers work Conservative Government Penal Policy 2015-2021 Christopher David Skinns, 2022-07-28 This book interrogates Conservative government penal policy for adult and young adult offenders in England and Wales between 2015 and 2021. Government penal policy is shown to have been often ineffective and costly and to have revived efforts to push the system towards a disastrous combination of austerity, outsourcing and punishment that has exacerbated the penal crisis. This investigation has meant touching on topical debates dealing with the impact of resource scarcity on offenders, experiences of the penal system, the impact of an increasing emphasis on punishment on offenders, sense of justice and fairness, the balance struck between infection control and offender welfare during the government handling of the SARS CoV 2 pandemic, and why successive Conservative governments have intransigently pursued a penal policy that has proved crisis exacerbating. The overall conclusion reached is that penal policy is too important to be left to governments alone and needs to be recalibrated by a one off inquiry complemented by an on going advisory body capable of requiring governments to explain or change. The book is distinctive in that it provides a critical review of penal policy change whilst combining this with insights derived from the sociological analysis of penal trends.
