product strategy Global portfolio strategy Project portfolio strategy Sub optimized strategies result in and contribute to a portfolio of misdirected projects and organizational dissatisfaction with project management outcomes unrelated to the actual project management process As an example ensuring the convergence and readiness of technologies that are critical for the design development and assembly of aircraft requires a disciplined and flexible approach for product and technology development Operating in an environment in which customer needs and supplier capabilities are dynamic requires continual focus on a portfolio of projects initiatives and capabilities that result in sustaining competitive advantage and influence Managing Aerospace Projects stresses the positive impact of project classification and the specific handling and leadership knowledge requirements so that these endeavors are indeed successful Some comparisons and lessons from the automotive industry are offered The notion that project management competence and capabilities are embedded in distinct ways of coordinating and combining multiple competencies suggests that failing to recognize the required organizational adaptations could be a major contributor to sub optimized project management outcomes **NASA SP.** ,1991 *Aeronautical Engineering* ,1993 A selection of annotated references to unclassified reports and journal articles that were introduced into the NASA scientific and technical information system and announced in Scientific and technical aerospace reports STAR and International aerospace abstracts IAA *Scientific and Technical Aerospace Reports* ,1992 **Flight International** ,2013 **SA226/7 Series** Fairchild Aircraft Corporation,1983 **Jane's All the World's Aircraft** ,2009 [A Cumulative Index to a Continuing Bibliography on Aeronautical Engineering](#) ,1986 [Aeronautical Engineering: A Cumulative Index to a Continuing Bibliography](#) ,1988 *Technical Literature Abstracts* Society of Automotive Engineers,1999 **Government reports annual index** ,199? **CIS Federal Register Index** ,1989 **Evolution of the Airliner** Ray Whitford,2007 Commercial air travel has come a long way since the first purpose built airliners took to the sky soon after World War I Countless innovations have enabled aircraft to fly higher faster and more efficiently and flights have become more comfortable and cheaper This important book based on a well received series of articles in Air International magazine offers an unparalleled insight into the way that the airliner has evolved and how each new breakthrough and refinement has affected the industry and the future path of development **Interavia** ,1986
