by providing more description assumptions and interpretation of results and an exercise related to analysis and output Chs 8
15 The use of SPSS AMOS diagrams to describe the theoretical models The key features of each of the software packages Ch
1 Guidelines for reporting SEM research Ch 16 www.routledge.com/9781138811935 which provides access to data sets that
can be used with any program links to other SEM examples related readings and journal articles and more Reorganized the
new edition begins with a more detailed introduction to SEM including the various software packages available followed by
chapters on data entry and editing and correlation which is critical to understanding how missing data non normality
measurement and restriction of range in scores affects SEM analysis Multiple regression path and factor models are then
reviewed and exploratory and confirmatory factor analysis is introduced These chapters demonstrate how observed variables
share variance in defining a latent variables and introduce how measurement error can be removed from observed variables
Chapter 7 details the 5 SEM modeling steps including model specification identification estimation testing and modification
along with a discussion of hypothesis testing and the related issues of power and sample and effect sizes Chapters 8 to 15
provide comprehensive introductions to different SEM models including Multiple Group Second Order CFA Dynamic Factor
Multiple Indicator Multiple Cause Mixed Variable and Mixture Multi Level Latent Growth and SEM Interaction Models Each
of the 5 SEM modeling steps is explained for each model along with an application Chapter exercises provide practice with
and enhance understanding of the analysis of each model The book concludes with a review of SEM guidelines for reporting
research Designed for introductory graduate courses in structural equation modeling factor analysis advanced multivariate
