Zac-Varghese, 2015-10-22 Together obesity and diabetes form a 21st century epidemic the treatment of which consumes a
substantial fraction of global health costs New and improved therapies are therefore desperately needed Incretins are short

control food intake body weight and glucose homeostasis This is one of the fastest areas of growth within diabetes research
and over the past decade increasing numbers of novel diabetes drugs many based on incretin action have been added to the
