Moldoveanu, Victor David, 2024-10-22 *Method Development in Analytical HPLC* presents the essential information for understanding the process of developing an HPLC method of analysis. It includes foundational information related to HPLC as well as discussion of sample types, the properties of analytes and matrices in the samples, and sample preparation. The core of the book describes the best ways for approaching method development in various types of HPLC and the criteria for method optimization and validation. This book provides clear guidance for adopting analytical methods from the literature and describes the development of original methods with selection of the suitable type of HPLC, of specific columns, mobile phase, and detection techniques, with an emphasis on the use of mass spectrometry for detection, as well as optimization and validation of the chosen analytical method. The book includes useful details on method development for specific types of chromatography, such as RP HPLC, HILIC, ion exchange, size exclusion, and chiral. *Method Development in Analytical HPLC* also includes information about green chemistry in analytical methods, computer-assisted method development, and other key contemporary aspects of the subject. Offers a systematic and logical presentation of the foundations of analytical HPLC. Goes in depth on method development for specific types of chromatography, such as RP HPLC, HILIC, ion exchange, and size exclusion. Includes methods with an emphasis on the use of mass spectrometry for detection. *Quality Control and Evaluation of Herbal Drugs* Pulok K. Mukherjee, 2019-05-30 *Quality Control and Evaluation of Herbal Drugs* brings together current thinking and practices for evaluation of natural products and traditional medicines. The use of herbal medicine in therapeutics is on the rise in both developed and developing countries, and this book facilitates the necessary development of quality standards for these medicines. This book elucidates on various challenges and opportunities for quality evaluation of herbal drugs with several integrated approaches, including metabolomics, chemoprofiling, marker analysis, stability testing, good practices for manufacturing, clinical aspects, Ethnopharmacology, and Ethnomedicine-inspired drug development. Written by Prof. Pulok K. Mukherjee, a leader in this field, the book highlights various methods, techniques, and approaches for evaluating the purity, quality, safety, and efficacy of herbal drugs. Particular attention is paid to methods that assess these drugs' activity, the compounds responsible, and their underlying mechanisms of action. The book describes the quality control parameters followed in India and other countries, including Japan, China, Bangladesh, and other Asian countries, as well as the regulatory profiles of the European Union and North America. This book will be useful in bio-prospecting of natural products and traditional medicine-inspired drug discovery and development. Provides new information on the research and development of natural remedies, essential reading on the study and use of natural resources for preventative or healing purposes. Brings together current thinking and practices in quality control and standardization of herbal drugs, highlighting several integrated approaches for metabolomics, chemoprofiling, and marker analysis. Aids in developing knowledge of various techniques, including macroscopy, microscopy, HPTLC.

The Congress Arsenic in the Environment offers an international multi and interdisciplinary discussion platform for research and innovation aimed towards a holistic solution to the problem posed by the environmental toxin arsenic with considerable societal impact The congress has focused on cutting edge and breakthrough research in physical chemical toxicological medical agricultural and other specific issues on arsenic across a broader environmental realm The Congress Arsenic in the Environment was first organized in Mexico City As2006 followed by As2008 in Valencia Spain As2010 in Tainan Taiwan As2012 in Cairns Australia and As2014 in Buenos Aires Argentina The 6th International Congress As2016 was held June 19 23 2016 in Stockholm Sweden and was entitled Arsenic Research and Global Sustainability The Congress addressed the broader context of arsenic research along the following themes Theme 1 Arsenic in Environmental Matrices and Interactions Air Water Soil and Biological Matrices Theme 2 Arsenic in Food Chain Theme 3 Arsenic and Health Theme 4 Clean Water Technology for Control of Arsenic Theme 5 Societal issues Policy Studies Mitigation and Management

Long term exposure to low to medium levels of arsenic via contaminated food and drinking water can have a serious impact on human health and globally more than 100 million people are at risk Since the end of the 20th century arsenic in drinking water mainly groundwater has emerged as a global health concern In the past decade the presence of arsenic in plant foods especially rice has gained increasing attention In the Nordic countries in particular the use of water soluble inorganic arsenic chemicals e g chromated copper arsenate CCA as wood preservatives and the mining of sulfidic ores have been flagged as health concern The issue has been accentuated by discoveries of naturally occurring arsenic in groundwater primarily in the private wells in parts of the Fennoscandian Shield and in sedimentary formations with potentially detrimental effects on public health Sweden has been at the forefront of research on the health effects of arsenic technological solutions for arsenic removal and sustainable mitigation measures for developing countries Hosting this Congress in Sweden was also relevant because historically Sweden has been one of the leading producer of As₂O₃ and its emission from the smelting industries in northern Sweden and has successfully implemented actions to reduce the industrial emissions of arsenic as well as minimizing the use of materials and products containing arsenic in since 1977 The Congress has gathered professionals involved in different segments of interdisciplinary research in an open forum and strengthened relations between academia industry research laboratories government agencies and the private sector to share an optimal atmosphere for exchange of

Snini, 2020-11-25 Mycotoxins are toxic secondary metabolites produced by fungi They cause deleterious effects on humans animals and plants More than one hundred mycotoxins are known which contaminate food and feed raw materials Fungal infection and mycotoxin contamination can occur directly in fields pre harvest stage during storage or during industrial processing post harvest stage Given the proven toxicity of mycotoxins and their widespread distribution it is necessary to prevent their occurrence in food and feed To limit mycotoxin contamination several techniques can be adopted at the pre harvest or post harvest stages These techniques can reduce mycotoxin concentration through fungal growth reduction or mechanisms leading to mycotoxin degradation or mycotoxin detoxification i e reduction of the toxicity Until very recently fungicides were favored to limit mycotoxin contamination by reducing fungal growth Nonetheless the sanitary and environmental impacts of these products and their effects on food quality encourage the development of alternative strategies based on biocontrol agents BCAs or natural compounds Moreover in some cases fungal growth reduction can stimulate mycotoxin production The focus of this Special Issue of Toxins is to gather the most recent advances related to reducing mycotoxin contamination in food and feed using BCAs and natural compounds In this context two main types of

approaches can be proposed Preventive methods that could be applied in the field during storage or during industrial processing and curative methods that detoxify contaminated matrices by eliminating the produced mycotoxin Coffee: From the Field to the Cup Paulo Mazzafera,Sara Adrián López de Andrade,Sarada Krishnan,Herminia Prieto Martinez,Maria Beatriz A.
