

WISCONSIN CUSTOM RATE GUIDE 2020

APRIL 2021

GENERAL:

The 2020 Wisconsin Custom Rate Guide was compiled by the USDA's National Agricultural Statistics Service (NASS), Wisconsin Field Office, in cooperation with the Wisconsin Department of Agriculture, Trade, and Consumer Protection, the University of Wisconsin-Extension, and the College of Agricultural & Life Sciences, University of Wisconsin-Madison.

This summary is the result of a mail and phone survey which collected rates paid by farmers for custom work performed in 2020. The figures are based on reports by custom operators and farmers who performed custom work and/or rent out equipment. There were 494 reports compiled.

Thank you to all survey participants who provided data for this publication! Your input made this report possible.

Most of the rates in this release include the cost of hiring a machine with fuel and operator, but exclude the cost of any materials. No attempt was made to distinguish between rates charged by custom operators who perform these operations as their main source of income and those who do custom work as a secondary source of income. This summary makes no effort to evaluate fairness of rates being charged.

DATA:

Included in this release are the number of reports, the average rate, and the median rate. The average provides an estimate of the prevailing charge with reliability improving as the number of responses increases. Median values offer an additional measure of the central tendency of the survey response distribution. Median values that represent an individual operation are withheld. Rates are typically influenced by fuel costs, soil conditions, topography, field size and shape, traditional practices in an area, and type, age, and availability of equipment. Reports were edited to remove items for which the respondent's figures were widely outside the range of other respondents' replies. Certain items may have appeared on the questionnaire, but were not summarized due to an insufficient number of responses.

Price changes for machinery, fuel, and labor should be taken into account when using this 2020 data for subsequent years.

REGIONAL DATA:

Beyond statewide figures, averages and medians at the regional level are included in this release where sufficient data was available. Please refer to Figure 1 to determine in which region your operation falls.
