The Politics and Power of Bob Dylan's Live Performances Erin C. Callahan, Court Carney, 2023-11-17 Ephemeral by nature the concert setlist is a rich if underexplored text for scholarly research How an artist curates a show is a significant

aspect of any concert's appeal. Through the placement of songs, variations in order or the omission of material, Bob Dylan's setlists form a meta narrative speaking to the power and significance of his music. These essays use the setlists from concerts throughout Dylan's career to study his approach to his material from the 1960s to the 2020s. These chapters from various disciplinary perspectives illustrate how the concert setlist can be used as a source to explore many aspects of Dylan's public life. Finally, this collection provides a new method to examine other musicians across genres with an interdisciplinary approach to setlists and the selectivity of performance. Unique in its approach and wide-ranging scholarly methodology, this book deepens our understanding of Bob Dylan the performer. *Negotiating Cohesion, Inequality and Change* Hannah Jones, 2013-09-09

How are multiculturalism, inequality, and belonging understood in the day-to-day thinking and practices of local government? Examining original empirical data, this book explores how local government officers and politicians negotiate difficult subjects linked with community cohesion, policy diversity, inequality, discrimination, extremism, migration, religion, class, power, and change. The book argues that such work necessitates uncomfortable positions when managing ethical, professional, and political commitments. Based on first-hand experience of working in urban local government and extensive ethnographic interview and documentary research, the book applies governmentality perspectives in a new way to consider how people working within government are subject to regimes of governmentality themselves and demonstrates how power operates through emotions. Its exploration of how sociological imaginations are applied beyond academia will be valuable to those arguing for the future of public services and building connections between the university and wider society, including scholars and students in sociology, social policy, social geography, urban studies, and politics, and policy practitioners in local and central government.
