Wood Or Aluminum Bat Science Projects:

The Science of Baseball A. Terry Bahill, 2018-12-04 This augmented new edition adds discussion of the bat's vertical sweetness gradient, eye-hand cross dominance models for the swing of a bat and accuracy of simulations. The book retains its description of dynamic collisions between baseballs, softballs and bats and the intricate modeling of these interactions using only basic math and physical principles. Veteran baseball science author Terry Bahill explains models for the speed and spin of balls and bats and calculations for bat-ball collisions at a level accessible to most students of the science of baseball. Demystifying the most important factors for understanding bat performance: bat weight, moment of inertia, the coefficient of restitution and characteristics of humans swinging the bats. Dr. Bahill also explains physical aspects of the optimal bat and the sweet spot. Praise for the First Edition: Dr. Bahill's book is the perfect tool for teaching how to solve some of baseball's basic science problems. Using only simple Newtonian principles and the conservation laws, Dr. Bahill explains how to model bat-ball collisions. Also, he derives equations governing the flight of the ball and proceeds to show what factors affect air density and how this density affects the ball's flight. And as a unique addition to his fine book, he provides advice for selecting the optimal bat. A surprising bonus: Dave Baldwin, PhD, Major League pitcher 1966-1973, lifetime Major League ERA 3.08. If I were the General Manager of a baseball team, I would tell my people to write a ten-page paper describing what this book contains that could improve our performance. I think the book provides the foundation for change. Bruce Gissing, Executive VP Operations, retired Boeing Commercial Airplanes. I had a chance to read your research and I fully agree with your findings. Baseball Legend Ted Williams in a 1984 letter to the author. [Sports Science Fair Projects](#) Madeline Goodstein, 2015-07-15 Why do baseballs have stitches? Why do footballs have an oblong shape? How does a Ping Pong ball change if you fill its center?
