Regulating and Combating Money Laundering and Terrorist Financing Nkechikwu Azinge-Egbiri, 2021-03-01 This book analytically reviews the impact of the global anti money laundering and counter terrorist financing AML CFT framework on the compliance trajectory of a number of jurisdictions to this framework The work begins by examining the international financial sector reform and its evolution to inculcate the global framework for AML CFT regulations It challenges the resulting uniform AML CFT due to its paradoxical impact on the compliance trajectory of African countries and emerging economies ACs EEs This is done through an examination of the pre conditions for effective regulation and compliance drivers for ACs EEs that reveals the behavioural impact of the AML CFT standards on the bloc of countries Through the application of agency theory it explores the relationship between ACs EEs on the one hand and the international financial institutions that formulate disseminate and facilitate compliance with the global framework for AML CFT standards on the other The remaining chapters review empirically the compliance pressures and resulting compliance trajectory of ACs EEs with the AML CFT standards The final part of the book provides a detailed explanation of the compliance challenges of ACs EEs and the legitimacy concerns that facilitate this This book offers a new direction on the impact of global AML CFT standards on ACs EEs and contributes to the understanding of the conditions under which the global standards are likely to facilitate proactive compliance within these blocs of countries As such it will be a valuable resource for academics researchers and policy makers working in this area

Big Tech Acquisitions and Merger Control Nils Stock, 2025-09-30 Big Tech Acquisitions and Merger Control Challenges Posed by Digital Platforms and Ecosystems Nils Stock Although legal analysis of merger related firm dominance in Big Tech has emphasised the so called GAFAM Google Amazon Facebook Apple and Microsoft this important book stresses the necessity for a much broader view

Numerous large tech platforms continue to seek dominance in and across various market segments by acquiring small start up companies with high competitive potential but yet little or no turnover thereby running the risk of escaping antitrust scrutiny This phenomenon is now often referred to as killer acquisitions and it raises problems with regard to both the jurisdictional and the substantive aspects of merger control which this book addresses comprehensively Focusing on legislative initiatives and enforcement practice especially in the European Union and the United Kingdom and through an in depth analysis of the most prominent decisions concerning Big Tech acquisitions the author spells out the nature of such relevant legal issues and strategies as the following the economic principles of platform competition and the particularities of digital ecosystems including their implications for merger control an extensive comparison of different jurisdictional rules and notification requirements beyond standard turnover thresholds how Big Tech acquisitions can be subjected to scrutiny in the European Union via referrals under Article 22 of the European Union Merger Regulation EUMR potentially in combination with national call in tools and or Article 14 of the Digital Markets Act DMA and how the latter compares to the reporting requirement under the Digital Markets Competition and Consumers DMCC Act in the United Kingdom market definition and market power assessments including but not limited to social media and advertising markets how both traditional and novel theories of harm can be applied in the context of digital platforms and ecosystems application of theories of harm relating to killer acquisitions and reverse killer acquisitions the development of an ecosystem theory of harm and artificial intelligence as the new frontier Policy proposals and the academic legal literature are taken into account with due regard to economic considerations as well With competition authorities and legislators worldwide grappling to find an appropriate response to the expansion and consolidation of dominance in various digital markets it appears necessary to contemplate alternatives to the current turnover based notification thresholds and to rethink the substantive assessment of Big Tech acquisitions This book with its thorough guidance on the characteristics challenges and treatment of digital platforms and ecosystems in the context of merger control and its clear exposition of applicable theories of harm will greatly assist practitioners competition authorities and policymakers to successfully navigate through the challenging tasks of establishing jurisdiction defining relevant markets and assessing market power and competitive harm
