Beginning iOS 7 Development Jack Nutting, David Mark, Jeff LaMarche, Fredrik Olsson, 2014-03-31 The team that brought you the bestselling Beginning iPhone Development is back again for Beginning iOS 7 Development bringing this

definitive guide up to date with Apple's latest and greatest iOS 7 SDK as well as with the latest version of Xcode. There's coverage of brand new technologies including a new chapter on Apple's Sprite Kit framework for game development as well as significant updates to existing material. You'll have everything you need to create your very own apps for the latest iOS devices. Every single sample app in the book has been rebuilt from scratch using latest Xcode and the latest 64 bit iOS 7 specific project templates and designed to take advantage of the latest Xcode features. Assuming only a minimal working knowledge of Objective C and written in a friendly easy to follow style. Beginning iOS 7 Development offers a complete soup to nuts course in iPhone iPad and iPod touch programming. The book starts with the basics walking through the process of downloading and installing Xcode and the iOS 7 SDK and then guides you through the creation of your first simple application. From there you'll learn how to integrate all the interface elements iOS users have come to know and love such as buttons switches pickers toolbars and sliders. You'll master a variety of design patterns from the simplest single view to complex hierarchical drill downs. The confusing art of table building will be demystified and you'll learn how to save your data using the iPhone file system. You'll also learn how to save and retrieve your data using a variety of persistence techniques including Core Data and SQLite. And there's much more.

Big Data, Open Data and Data Development Jean-Louis Monino, Soraya Sedkaoui, 2016-03-03. The world has become digital and technological advances have multiplied circuits with access to data their processing and their diffusion. New technologies have now reached a certain maturity. Data are available to everyone anywhere on the planet. The number of Internet users in 2014 was 2.9 billion or 41% of the world population. The need for knowledge is becoming apparent in order to understand this multitude of data. We must educate inform and train the masses. The development of related technologies such as the advent of the Internet social networks cloud computing digital factories has increased the available volumes of data. Currently each individual creates consumes uses digital information more than 3.4 million e-mails are sent worldwide every second or 107 000 billion annually with 14 600 e-mails per year per person but more than 70% are spam. Billions of pieces of content are shared on social networks such as Facebook more than 2.46 million every minute. We spend more than 4.8 hours a day on the Internet using a computer and 2.1 hours using a mobile. Data this new ethereal manna from heaven is produced in real time. It comes in a continuous stream from a multitude of sources which are generally heterogeneous. This accumulation of data of all types audio video files photos etc generates new activities the aim of which is to analyze this enormous mass of information. It is then necessary to adapt and try new approaches new methods new knowledge and new ways of working resulting in new properties and new challenges since SEO logic must be created and implemented. At company level this mass of data is difficult to manage. Its interpretation is primarily a challenge. This impacts those who are there to manipulate the mass and requires a specific infrastructure for creation storage processing analysis and recovery. The biggest challenge lies in the valuing of data available in quantity diversity and access speed.
