Macaloon, 2020-07-24 The *Flame Relay and the Olympic Movement* is the first book length scholarly study in English of the contemporary Olympic flame relay Reporting for the first time on years of intensive ethnographic research and organizational intervention MacAloon literally follows the Olympic flame through twenty years of intercultural encounter conflict and negotiation Focusing on the frequently harmonious sometimes perilous encounters among Greek flame relay officials cultural agents and discourses foreign Olympic Games organizing committees and such transnational actors as the

IOC and its corporate sponsors since 1984 a context is created for understanding the significance for the Olympic movement and for globalization studies of the 2004 Athens flame relay the first to travel the entire world Through intensive interviews and co participations with leading Greek and American actors and the contributions of young Greek researchers who worked backstage on the relay Bearing Light demonstrates how culturally parochial the managerial regime of world s best practices often turns out to be and yet how inescapable it has become for those who wish to communicate across cultural and political boundaries This dilemma the contributors argue constitutes the practical form in which the struggle to preserve a sense of Olympism and the Olympic Movement against the demands and prerogatives of today s Olympic sports industry is being chiefly fought out This book was previously published as a special issue of Sport in Society **Technical Series - Intergovernmental Oceanographic Commission** Intergovernmental Oceanographic Commission,1988 Urban Transformations through Exceptional Architecture Nadia Alaily-Mattar,Alain Thierstein,2021-05-30 Urban Transformations through Exceptional Architecture focusses on the nexus between architecturally exceptional projects and the city It addresses the following questions How can the complexity of these projects be comprehended What roles do the political contexts play in the commissioning of such projects and what audiences do these projects serve How has the granting of professional recognition for architects changed and what will this change mean to measures of exceptionality in architectural design What roles do the architectural competitions play in the process of commissioning the design of architecturally exceptional projects and do design competitions as an urban planning tool grant high value designs Architecturally exceptional projects are situated in physical urban fabrics How can this situatedness be analysed and what different values does the urban design dimension of these projects add By considering diverse aspects of architecturally exceptional projects the chapters in this book utilise a variety of research methods They bring into dialogue a range of themes regarding the architectural urban design and political aspects of these projects This volume illustrates that multidisciplinary might well be the best strategy to balance the risks of over simplification and the challenges of complexity in analysing these exceptional projects and the city in its ever transformative process The chapters in this book were originally published as a special issue of the Journal of Urban Design Managing the Olympics S. Frawley,D. Adair,2013-07-23 The Olympic Games are the world s most complex and challenging sport mega event to organize Managing the Olympics is the first ever attempt to bring together the world s leading Olympic management researchers in one book and draws on the latest research into the management challenges faced by the organizers and key stakeholders of the Games *Rethinking Olympic Legacy* Vassil Girginov,2018-04-19 How do Olympic legacies come about This book offers an alternative approach to the study of Olympic and mega sport event legacy challenging how legacy is conceptualised and practised It shifts the focus from legacy as a retrospective concept concerned with what has been left behind after the Games to a prospective one interested in actions and interactions stimulated by the Games The book argues that creating Olympic legacy is a continuing four stage process

involving investing the accumulated common Olympic cultural capital interpellating forming a trusteeship relationship where one party undertakes to change the capacity of another developing ensuring participation in interactions and resource development and codifying documenting sharing and remembering legacies so they become cultural capital It presents a developmental approach to the Olympics which involves vision trustees and trusteeship and is concerned with capacity building at individual organisational and societal levels Thinking of Olympic legacy as capacity building allows seeing the goal of legacy as an embodiment of the aspirations of the Olympic Movement and the Games to introduce radical change in society by transforming its structure Rethinking Olympic Legacy is essential reading for all students and scholars within an interest in the Olympics as well as for administrators policymakers and planners involved with mega sport events
