Abstract [Times NR 12]

The purpose of the abstract in a technical paper is to enable potential readers to determine whether or not the paper contains material of interest to them. It should include what new data, conclusions, or perspective the reader will find, followed by a brief statement of the significance of this new material. The abstract should be self-contained and coherently independent of the rest of the document. The abstract MUST be no more than 300 words and cannot contain footnotes, figures, tables, or equations. Each technical paper must begin with abstract in English and the paragraph should be justified with 1cm indent on both sides. Use Times New Roman 10.

Keywords: Civil, Chemical, Electrical, Mechanical [3 to 5 key words, Time NR 10, Italic]

1.0 Introduction [Times New Roman 12]

Authors are request to read the instructions carefully. Authors are responsible for all the material presented in the technical papers. All technical papers must be in English. These guidelines include complete descriptions of the fonts, spacing, and related information for producing your technical papers; please do not alter them.

A good introduction in a technical paper should describes the overall issue being addressed and why it is important; states the scope and goals of the work; provides background material (including a survey of relevant prior work) to bring the intended audience up to speed; orients the reader by outlining the organizational structure of the paper.

2.0 Literature Review [Times NR 12]

The technical paper must be with page size of A4. Body of paper should be formatted in one column, with 2.54 cm (1") top, 2.54 (1") bottom margins and 2.54 (1") margins on sides. Use Times New Roman font pt 11, justified on both sides. However the headings must be followed by using Times New Roman font pt 12.

2.1 Paragraph [Times NR 12]

The first line is to be indented 1 cm to indicate the beginning of each paragraph. Do not change your font sizes or line spacing, and try to avoid headers, footers and footnotes. The reference should be mentioned with number in closed bracket [1]. For multiple references in sequence it should be used as [2-5], however for references not in sequence it should be separated by comma [1, 3, 5].

2.2 Abbreviations and Acronyms [Times NR 12]

Define abbreviations and acronyms the first time they are used in the text, even after they have been defined in the abstract. Abbreviations such as IEEE, SI, MKS, CGS, sc, dc, and rms do not have to be defined. Do not use abbreviations in the title or heads unless they are unavoidable.
