pillars with bracketing above are compared to blossoming trees More importantly this intriguing imagery was shared by different social groups in particular craftsmen and literati and craftsmen themselves employed literary knowledge in naming architectural elements Relating these phenomena to the unprecedented flourishing of literature the literati's greater admiration of technical knowledge and the higher intellectual capacity of craftsmen during the Song Architecture and Metaphor demonstrates how the learned and unlearned cultures entangled in the construction of architectural knowledge in premodern China It convincingly shows that technical language served as a faithful carrier of contemporary popular culture and aesthetic concepts Chinese Architecture and Metaphor demonstrates a high level of engagement with a broad spectrum of sophisticated Chinese sources It will become a classic work for all students and scholars of East Asian architecture

Ceilings and Dreams Paul Emmons, Federica Goffi, Jodi La Coe, 2019-07-08 Where is the space for dreaming in the twenty first century Lofty thoughts like dreams are born and live overhead just as they have been represented in Renaissance paintings and modern cartoons Ceilings are often repositories of stories events and otherwise invisible oneiric narratives Yet environments that inspire innovative thinking are dwindling as our world confronts enormous challenges and almost all of our thinking debating and decision making takes place under endless ceiling grids Quantitative research establishes that spaces with taller ceilings elicit broader more creative thoughts Today ceilings are usually squat conduits of technology they have become the blind spot of modern architecture The twenty essays in this book look across cultures places and ceilings over time to discover their potential to uplift the human spirit Not just one building element among many the ceiling is a key to unlock the architectural imagination Ceilings and Dreams aims to correct this blind spot and encourages architects and designers researchers and students to look up through writings organized into three

expansive categories reveries suspensions and inversions The contributors contemplate the architecture of levity and the potential of the ceiling once again as a place for dreaming
