Aging in European Societies. Constantinos Phellas, 2012-09-28. Between longer life expectancies and declining birth rates, Europe's elder population is growing into a sizable minority with considerable impact on nations' health systems and economies, in other words, global implications as well as local and regional ones. Those investing in the health of older adults need a double perspective: the social and clinical complexity of aging and the larger forces shaping these experiences. *Aging in European Societies* examines aging trends across the continent, analyzing individual and collective variables that affect the lives of older adults and drawing salient comparisons with other parts of the world. An interdisciplinary panel of experts provides theory, research and empirical findings with examples from the UK, Cyprus, Sweden and others in key areas such as family and social supports, physical and cognitive changes, dependence and autonomy issues and living arrangements. The book's wide net approach offers insights into not only aging but aging well. And of particular importance, it details approaches to defining and measuring the elusive but crucial concept of quality of life. Included in the coverage: The potential for technology to improve elders' quality of life; Dementia and quality of life issues; Changes in functional ability with aging and over time; Family networks and supports in older age; Factors influencing inequalities in quality of life; Late-life learning in the EU.

Gerontologists sociologists health and cross cultural psychologists and public health policymakers will welcome Aging in European Societies as a springboard toward continued discussion new directions for research and improvements in policy and practice *Consumer Reports Buying Guide* Consumer Reports (Firm),2005-11 Presents a collection of reviews ratings and advice on a wide range of consumer products including electronics air conditioners cell phones automobiles dryers home theaters and more **Oh!
